made in the area

**Sums of Squares of Integers** Carlos J. Moreno, Jr. Wagstaff, 2005-12-09 Sums of Squares of Integers covers topics in combinatorial number theory as they relate to counting representations of integers as sums of a certain number of squares The book introduces a stimulating area of number theory where research continues to proliferate It is a book of firsts namely it is the first book to combine Liouville's elementary methods with the analytic methods of modular functions to study the representation of integers as sums of squares It is the first book to tell how to compute the number of representations of an integer  $n$  as the sum of  $s$  squares of integers for any  $s$  and  $n$  It is also the first book to give a proof of Szemerédi's theorem and is the first number theory book to discuss how the modern theory of modular forms complements and clarifies the classical fundamental results about sums of squares The book presents several existing yet still interesting and instructive examples of modular forms Two chapters develop useful properties of the Bernoulli numbers and illustrate arithmetic progressions proving the theorems of van der Waerden Roth and Szemerédi The book also explains applications of the theory to three problems that lie outside of number theory in the areas of cryptanalysis microwave radiation and diamond cutting The text is complemented by the inclusion of over one hundred exercises to test the reader's understanding

*Test Equating* Michael J. Kolen, Robert L. Brennan, 1995 Many researchers in the psychology and statistical communities have paid increasing attention to test equating as issues of using multiple test forms have arisen and in response to criticisms of traditional testing techniques This text provides a practically oriented introduction to test equating covering discussions of the most frequently used equating methodologies and many of the practical issues involved The main themes covered by the book are the purposes and assumptions of equating classical equating methods item response theory equating methods standard errors of equating and practical issues in equating
