Hoffman, Palmer, 1978 *Linear Algebra with Applications* Jeffrey Holt, 2013-04-01 Many students of linear algebra hit a wall  
at mid semester Having spent the first part of the term doing mostly computational work they are unprepared for the rigors  
of conceptual thinking in an abstract setting that is frequently the focus of the second half of the course Holt's *Linear*  
*Algebra with Applications* blends computational and conceptual topics throughout Early treatment of conceptual topics in the  
context of Euclidean space gives students more time and a familiar setting in which to absorb them This organization also  
makes it possible to treat eigenvalues and eigenvectors earlier than in most texts Abstract vector spaces are introduced later  
once students have developed a solid conceptual foundation Concepts and topics are frequently accompanied by applications  
to provide context and motivation Because many students learn by example *Linear Algebra with Applications* provides a large  
number of representative examples over and above those used to introduce topics The text also has over 2500 exercises  
covering computational and conceptual topics over a range of difficulty levels *The Bulletin of the National Association of*

**Mathematics and Teaching** Daniel Chazan, 2000-01-01 Based on the author's experience as a researcher and teacher of  
lower track students *Beyond Formulas in Mathematics and Teaching* illuminates the complex dynamics of the algebra  
classroom From within this setting Daniel Chazan thoughtfully explores topics that concern all dedicated educators how to  
really know one's students how to find engaging material and how to inspire meaningful classroom conversations Throughout  
he addresses the predicaments that are central to the lives of teachers who work in standard educational settings By  
highlighting teaching dilemmas Chazan prompts readers to consider what their own responses would be in similar situations  
With an eye to ways of restructuring roles and relationships *Beyond Formulas in Mathematics and Teaching* is essential  
reading for educators seeking to enhance their teaching practices and understanding of students who may be estranged from
