## **Cradle To Cradle McDonough:**

*Cradle to Cradle* William McDonough, Michael Braungart, 2010-03-01 A manifesto for a radically different philosophy and practice of manufacture and environmentalism Reduce reuse recycle urge environmentalists in other words do more with less in order to minimize damage But as this provocative visionary book argues this approach perpetuates a one way cradle to grave manufacturing model that dates to the Industrial Revolution and casts off as much as 90 percent of the materials it uses as waste much of it toxic Why not challenge the notion that human industry must inevitably damage the natural world In fact why not take nature itself as our model A tree produces thousands of blossoms in order to create another tree yet we do not consider its abundance wasteful but safe beautiful and highly effective hence waste equals food is the first principle the book sets forth Products might be designed so that after their useful life they provide nourishment for something new either as biological nutrients that safely re enter the environment or as technical nutrients that circulate within closed loop industrial cycles without being downcycled into low grade uses as most recyclables now are Elaborating their principles from experience re designing everything from carpeting to corporate campuses William McDonough and Michael Braungart make an exciting and viable case for change **Cradle to cradle : remaking the way we make things** Michael

Braungart, William McDonough, 2019-01-10 Michael Braungart and William McDonough propose a plan for our planet in this stunning new edition of their radical ecological manifesto This book proposes a new vision for modern industry Instead of our current wasteful and polluting methods of manufacturing we could be taking nature as a model for making things With the right redesign objects that have come to the end of their useful lives should provide the basis for something new In designing and producing products we need to stop worrying about being less bad and start finding ways of actually being good

**The Upcycle** William

McDonough, Michael Braungart, 2013-04-16 From the authors of *Cradle to Cradle* we learn what's next *The Upcycle* *The Upcycle* is the eagerly awaited follow up to *Cradle to Cradle* one of the most consequential ecological manifestoes of our time Now drawing on the green living lessons gained from 10 years of putting the *Cradle to Cradle* concept into practice with businesses governments and ordinary people William McDonough and Michael Braungart envision the next step in the solution to our ecological crisis We don't just use or reuse and recycle resources with greater effectiveness we actually improve the natural world as we live create and build For McDonough and Braungart the questions of resource scarcity and sustainability are questions of design They are practical minded visionaries They envision beneficial designs of products buildings and business practices and they show us these ideas being put to use around the world as everyday objects like chairs cars and factories are being reimagined not just to sustain life on the planet but to grow it It is an eye opening inspiring tour of our green future as it unfolds in front of us *The Upcycle* is as ambitious as such classics as Rachel Carson's *Silent Spring* but its mission is very different McDonough and Braungart want to turn on its head our very understanding of

the human role on earth Instead of protecting the planet from human impact why not redesign our activity to improve the environment We can have a beneficial sustainable footprint Abundance for all The goal is within our reach
