Schabas,2009-02-19 The 1948 Genocide Convention has become a vital legal tool in the international campaign against impunity Its provisions including its enigmatic definition of the crime and its pledge both to punish and prevent the crime of crimes have now been interpreted in important judgments by the International Court of Justice the ad hoc Tribunals for the former Yugoslavia and Rwanda and various domestic courts The second edition of this definitive work focuses on the judicial interpretation of the Convention relying on debates in the International Law Commission political statements in bodies like the General Assembly of the United Nations and the growing body of case law Attention is given to the concept of protected groups to problems of criminal prosecution and to issues of international judicial cooperation such as extradition The duty to prevent genocide and its relationship with

the emerging doctrine of the responsibility to protect are also explored **Comparative Criminal Justice Systems** Philip L. Reichel,1999 Discussing how various countries around the world have organized their police courts and corrections agencies this insightful text provides the rationale for studying cross national issues in criminal justice by giving students a knowledge base for understanding and appreciating the different ways justice is conceived and achieved around the world

The Betrayal Kim Christian Priemel,2018-05-17 At the end of World War II the Allies faced a threefold challenge how to punish perpetrators of appalling crimes for which the categories of genocide and crimes against humanity had to be coined how to explain that these had been committed by Germany of all nations and how to reform Germans The Allied answer to this conundrum was the application of historical reasoning to legal procedure In the thirteen Nuremberg trials held between 1945 and 1949 and in corresponding cases elsewhere a concerted effort was made to punish key perpetrators while at the same time providing a complex analysis of the Nazi state and German history Building on a long debate about Germany's divergence from a presumed Western path of development Allied prosecutors sketched a historical trajectory which had led Germany to betray the Western model Historical reasoning both accounted for the moral breakdown of a civilised nation and rendered plausible arguments that this had indeed been a collective failure rather than one of a small criminal clique The prosecutors therefore carefully laid out how institutions such as private enterprise academic science the military or bureaucracy which looked ostensibly similar to their opposite numbers in the Allied nations had been corrupted in Germany even before Hitler's rise to power While the argument depending on individual protagonists subject matters and contexts met with uneven success in court it offered a final twist which was of obvious appeal in the Cold War to come if Germany had lost its way it could still be brought back into the Western fold The first comprehensive study of the Nuremberg trials The Betrayal thus also explores how history underpins transitional trials as we encounter them in today's courtrooms from Arusha to The Hague

Law and Society Matthew Lippman,2020-08-07 Law and Society offers a contemporary overview of the structure and function of legal institutions along with a lively discussion of criminal and civil law and their impact on society Author Matthew Lippman draws on insights from over thirty years of teaching to develop an interdisciplinary approach that introduces students to both the influence of law on society and the influence of society on the law Distinctive coverage of diversity inequality civil liberties and globalism provides an incisive look at the intersection of theory and practice The highly anticipated Third Edition includes updated discussions of issues facing today's society including inequality international human rights privacy and surveillance and social control Included with this title The password protected Instructor Resource Site formally known as SAGE Edge offers access to all text specific resources including a test bank and editable chapter specific PowerPoint slides *Bowker's Law Books and Serials in Print* ,1995 Bundle: Lippman, Criminal Procedure 5e (Vantage Shipped Access Card) + Lippman, Criminal Procedure 5e (Loose-Leaf) Matthew Lippman,2022-10-21 *The SAGE Encyclopedia of Terrorism, Second Edition* Gus Martin,2011-06-15 Six years after publication of the first edition of the best

selling Encyclopedia of Terrorism much has changed on the national security scene Despite the dark promises of Osama bin Laden following the 9 11 attacks the United States has not experienced any major domestic terror incidents Al Qaeda itself is believed to be a severely crippled organization But while U S wars in Afghanistan and Iraq not to mention the arrival of the Obama administration a new balance of power within Congress and an increasingly fragile economic picture have significantly affected the national security picture the threat of economic chaos and massive loss of life due to terror attacks has not abated Indeed in July 2008 analysts pointed out that even a relatively small terrorist organization could present a dire threat with some experts arguing that a biological chemical or even nuclear attack on a major U S city is all but inevitable In this highly charged rapidly shifting environment we are pleased to present the The SAGE Encyclopedia of Terrorism Second Edition a thoroughly updated and expanded edition of the original highly regarded reference work Nearly 100 000 words of new material will be added along with fully updated original entries and expanded coverage New introductory essays will explore the impact of terrorism on economics public health religion and even pop culture Ethical issues such as the role of torture in interrogations competing notions of security versus liberty and the debates over FISA legislation and Guantanamo Bay will also be covered Two dozen entries on significant recent events such as the London bombings Chechen attacks on Russian interests and the rescue of Ingrid Bettancourt and some 60 additional new entries will restore the work as an up to the minute natural first stop for researchers

Broken Scales Tom Diaz,2021-10-15

Humans are a species that classifies We arrange the flow of the things and events that we see and experience place them into categories and erect boundaries around those categories Among the boundaries that we erect are those that we put around groups of other human beings The evil side of human classification of other human beings is that we sometimes create false categories of other people as is often the case in racial ethnic and religious stereotypes This unmindful creation of empty categories of human characteristics is what happened during two periods crucial to the construction of race in America This is racism The United States is in a period of deep cultural flux and conflict much of it seen through the lens of race Tom Diaz proposes that the everyday actions of ordinary people in the context of extreme political and cultural polarization distort the criminal justice system and betray the lofty ideals expressed in American founding documents and centuries of Anglo American articulations of basic human rights These everyday actions range across a spectrum from the armed intervention of private citizens in the forms of individual action neighborhood watches and citizen s arrests to the expectations imposed on law enforcement in particular and the criminal justice system in general
