Shattering Culture Mary-Jo DeVecchio Good, Sarah S. Willen, Seth Donal Hannah, Ken Vickery, Lawrence Taeseng Park, 2011-11-01 Culture counts has long been a rallying cry among health advocates and policymakers concerned with racial disparities in health care A generation ago the women s health movement led to a host of changes that also benefited racial minorities including more culturally aware medical staff enhanced health education and the mandated inclusion of women and minorities in federally funded research Many health professionals would now agree that cultural competence is important in clinical settings but in what ways Shattering Culture provides an insightful view of medicine and psychiatry as they are practiced in today s culturally diverse clinical settings The book offers a compelling account of the many ways culture shapes how doctors conduct their practices

and how patients feel about the care they receive Based on interviews with clinicians health care staff and patients Shattering Culture shows the human face of health care in America Building on over a decade of research led by Mary Jo Good the book delves into the cultural backgrounds of patients and their health care providers as well as the institutional cultures of clinical settings to illuminate how these many cultures interact and shape the quality of patient care Sarah Willen explores the controversial practice of matching doctors and patients based on a shared race ethnicity or language and finds a spectrum of arguments challenging its usefulness including patients who may fear being judged negatively by providers from the same culture Seth Hannah introduces the concept of cultural environments of hyperdiversity describing complex cultural identities Antonio Bullon and Mary Jo Good demonstrate how regulations meant to standardize the caregiving process such as the use of templates and check boxes instead of narrative notes have steadily limited clinician flexibility autonomy and the time they can dedicate to caring for patients Elizabeth Carpenter Song looks at positive doctor patient relationships in mental health care settings and finds that the most successful of these are based on mutual recognition patients who can express their concerns and clinicians who validate them In the book s final essay Hannah Good and Park show how navigating the maze of insurance regulations financial arrangements and paperwork compromises the effectiveness of mental health professionals seeking to provide quality care to minority and poor patients Rapidly increasing diversity on one hand and bureaucratic regulations on the other are two realities that have made providing culturally sensitive care even more challenging for doctors Few opportunities exist to go inside the world of medical and mental health clinics and see how these realities are influencing patient care Shattering Culture provides a rare look at the day to day experiences of psychiatrists and other clinicians and offers multiple perspectives on what culture means to doctors staff and patients and how it shapes the practice of medicine and psychiatry
