**Photography Composition** James Carren, 2015-10-09 Master The Art of Photography Composition Learn All The Right Tricks to Make You A Better Photographer Today FREE Bonus Inside Photography Composition By Amazon 1 Best Selling Author James Carren In Photography Composition you will find all you need to know to learn the basics of composition It will teach you the proper terms and ways to apply rules that you might already know instinctively yet not quite understand why they work the way they do Here Is A Preview of What You ll Learn In This Book

Happy accidents This tip teaches you how to pay attention to the following rules in order to replicate happy accidents and to be able to more purposefully craft your photographs

Rule of thirds This basic rule of composition is often the first to be learned in many art classes It teaches you where to place points of interest in your photos

Leading lines This tip shows you how lines can help move a viewer s eye around the composition

Move around Don t just stick to one position or vantage point when you shoot Moving around gives you access to different perspectives which might actually bring better compositions than what you first assumed

Horizon lines Different from leading lines horizon lines break up the frame into two parts

Shape You will learn how to utilize shape that already exists in the frame and how to create it where you want it using points of interest

Foreground and background This tip also mentions usage of mid ground and why you should take advantage of the entire depth of your frame not just the immediate foreground

Weight You can give weight to your photos by placing a heavier subject to one side or the top or bottom of a frame

Juxtaposition Juxtaposition has to do with both the composition of your photo as well as the content of your photo It basically means that you will place two opposite things side by side This could be anything from darkness and light complementary colors or things that have differing symbolic meaning

Balance Balance ironically you may think is achieved in odd numbers

Tension Tension also often has a lot to do with the content of a photo as well You can create tension by examining the relationships of your subjects and composing them accordingly

Framing Framing is so very important in composition It can dramatically alter a viewer s perception of a scene Also especially with people it s important not to cut part of your subject out of the frame

Color Finally there is color which can often be used as a crutch by new photographers However with this tip you will learn how to properly control it and use it to your advantage for maximum visual and emotional effect While it may seem overwhelming at first combining all of these elements will soon become a snap once you learn to recognize them As your awareness grows so will your ability to utilize them and even artfully and successfully break rules as well
