Postcontinental Realism Ernesto Castro,2022-10-17 Is philosophy still alive Are there any alternatives to univocal postmodernist thought Is there any point in asking age old questions about the existence of reality and the possibility of knowledge about being ontology and knowing epistemology In this book Ernesto Castro issues a resounding yes to these and many other questions plaguing philosophy today Postcontinental realism is the term coined by Castro to designate a group of realist thinkers who have overcome contemporary philosophy s time honored division between the analytic tradition concerned with epistemological and scientific questions and the continental tradition concerned with artistic and ontological questions Written in a perfectly plain style that is accessible to readers from all walks of life including those without a previous academic education the author introduces the readers to the works and ideas of important living philosophers such as Quentin Meillassoux Ray Brassier Graham Harman Iain Hamilton Grant Maurizio Ferraris or Markus Gabriel Published with the support of Fundacion Sicomoro **Materials Encyclopedia for Creatives** Élodie Ternaux,2022-11-07 Materials

and the myriad technologies that have been developed to manipulate them are of essential relevance to product designers architects artists and stylists as they represent the starting point for every product and every architectural work The book is an encyclopaedic compendium of around 1 000 terms in this field from aerogel to marble to zirconium It features traditional and frequently used materials as well as new and unexpected ones Their respective advantages and disadvantages are precisely described In addition terms related to production processes such as upcycling or tanning or that describe the properties of materials or are closely related to the topic have also been included

Law, Obligation, Community Daniel Matthews, Scott Veitch, 2018-06-27 Against an ever expanding and diversifying rights talk this book re opens the question of obligation from not only legal but also ethical sociological and political perspectives Its premise is that obligation has a primacy ahead of rights because rights attach to practices and modes of being that are already saturated with obligations Obligations thus lie at the core not just of law but of community Yet the distinctive meanings range and situations of obligation have tended to remain under theorised in legal scholarship In response this book examines the sense in which we are multiply bound beings to law and legal institutions as much as we are to place community memory and the various social institutions that give shape to collective life Sharing this set of concerns each of the international group of scholars contributing to this volume traces the specificity of the binding force of obligations their techniques and modes of expression as well as their centrally important role in giving form to lawful relations Together they provide an innovative and challenging contribution to legal scholarship one that will also be of relevance to those working in politics philosophy and social theory

Mapping Controversies in Architecture Professor Albena Yaneva, 2013-06-28 The book tackles a number of challenging questions How can we conceptualize architectural objects and practices without falling into the divides architecture society nature culture materiality meaning How can we prevent these abstractions from continuing to blind architectural theory What is the alternative to critical architecture Mapping controversies is a research method and teaching philosophy that allows divides to be crossed It offers a new methodology for following debates surrounding contested urban knowledge Engaging in explorations of on going and recent controversies and re visiting some well known debates the analysis foregrounds traces and maps the changing sets of positions triggered by design the 2012 Olympics stadium in London the Welsh parliament in Cardiff the Heathrow airport runway extension the Sydney Opera House the Eiffel Tower By mobilizing digital technologies and new computational design techniques we are able to visualize the variety of factors that impinge on design and track actors trajectories changing groupings concerns and modalities of action The book places architecture at the intersection of the human and the nonhuman the particular and the general It allows its networks to be re established and to run between local and global social and technical Mapping controversies can be extrapolated to a wide range of complex phenomena of hybrid nature

Reading Without Maps? Den Tandt Christophe (ed.), 2005 Among the intellectual debates of the last forty years the critique of cultural canons has attracted the highest share of public attention

stirring academic educational and media controversies on both sides of the Atlantic Postmodernism feminism postcolonialism and multiculturalism have refashioned the attitudes of educators and audiences towards cultural memory opening up curricula to subjects and traditions previously excluded from the humanities Predictably these new critical practices have triggered heated responses from commentators fearing that culture and education might thereby be deprived of their capacity to provide audiences and learners with proper groundings and landmarks The present volume gathers contributions that throw light on multiple aspects of this reconfiguration of cultural memory It brings together essays focusing on the dynamics of canon formation in several fields literature drama film and music Contributors examine how writers and communities find their bearings in a cultural landscape more complex than that previously envisaged by advocates of the Great Tradition Specifically the present essays throw light on the status of modernist writing drama in English or popular genres within the new canonical topography elaborated at the turn of the twenty first century
