Economic Dynamics Giancarlo Gandolfo, 1997 Treating the mathematical methods used in the economic dynamics this book shows how they are utilised to build and analyse dynamical models Accordingly the focus is on the methods and every new mathematical technique introduced is followed by its application to select economic models The mathematical methods covered range from elementary linear difference and differential equations and simultaneous systems to the qualitative analysis of non linear dynamical systems Stability considerations are stressed throughout including many advanced topics Bifurcation and chaos theory are also dealt with The reader is guided through a step by step analysis of each topic be it a mathematical method or an economic model The Study Edition also provides the reader with solutions to the numerous exercises

The Publishers Weekly, 1928 *Guide to Reprints*, 2009 Economic Information, Decision, and Prediction M. Marschak, 2012-12-06 The papers of Jacob Marschak which follow in these volumes are an extraordinary combination of original and fruitful departures in economic and social thought superb clarity of exposition and sensitivity to the values of earlier work and even competing traditions They make us marvel alike at their variety their quantity and their quality But they do not even so fully reflect Marschak s contributions to the development of social science He has had an unusual influence as one who exercises leadership In a formal organizational sense this role has been manifest in his capacity as Director of the Cowles Commission for Research in Economics then at the University of Chicago in that organization s most productive and influential period and later in his central role in the Western Management Science Institute at the University of California at Los Angeles I can speak from first hand knowledge about the first His special capacities are first the recognition of promising new concepts and of promising young scholars and second getting his colleagues to join him in developing the ideas and involving them fully in the necessary tasks There was an unusual combination of strength and humility in his methods a display of force in pushing the work along but a willingness almost an insistence on treating even the most junior associate as a fully equal colleague in intellectual development whose criticism of himself was to be encouraged His leadership has been exercised in the absence of formal positions
