Smart Organizations in Industry 5.0 Sebastian Saniuk, Sandra Grabowska, Anna Adamik, 2024-12-31 The Fourth Industrial Revolution means the widespread digitization of economic processes using more economical and efficient production technologies Orientation towards productivity flexibility and low production costs results in a slow process of dehumanization of industry and focus only on implementing digital technologies of Industry 4.0 A natural consequence of this trend is the concern of workers governments and societies about new challenges and the role of humans in industry and the economy The hope is the emergence of a new industry concept proposed by the European Commission that expands the features of the existing Industry 4.0 concept to include human centric environmental and resilience aspects in smart organizations Industry 5.0 is an excellent alternative to the development of today's digital and dehumanized world and this book presents challenges and priority directions for smart organizations in an environment shaped by the pillars of Industry 5.0 This research volume discusses the development of technologies that support human oriented work systems sustainable production and system resilience in intelligent organizations It presents an educational challenge for universities and vocational schools in preparing employees for intelligent organizations and will be of interest to researchers academics

based view SRBV theory and social entrepreneurial orientation SEO this study seeks to investigate how SEs can orchestrate their resources and capabilities to enhance sustainable performance effectively

METHODOLOGY This study employed a quantitative approach to investigate the relationships between resources capabilities SEO and sustainable performance among social enterprises in Greater Jakarta Indonesia 438 data were collected using a structured survey questionnaire designed with items measured on a 5 point Likert scale Partial Least Squares Structural Equation Modelling PLS SEM was used to analyze the model

FINDINGS A total of 438 responses were obtained from social enterprises in Indonesia The findings suggest that social resources social capabilities and social entrepreneurial orientation have a positive influence on sustainable performance The findings also reveal that social resources and social capabilities influence the achievement of SEO Furthermore the findings indicate that SEO mediates the relationship between social capabilities and sustainability performance more effectively than social resources This implies that SEO enhances sustainable performance by reinforcing organizational capabilities including strategic decision making resource optimization and risk management

IMPLICATIONS This study contributes to the literature on sustainability by emphasizing the critical role of resources capabilities and social entrepreneurial orientation in the success of SEs It offers valuable insights for SEs on how to navigate challenges and make strategic decisions to meet sustainable outcomes Moreover the findings have practical implications for researchers enterprises and policymakers to improve the structural support and operational environment for SEs
