Brown,Adrian C. Williams,2019-03-01 The Art and Science of Dermal Formulation Development is a comprehensive guide to the theory and practice of transdermal and topical formulation development covering preclinical studies evaluation and regulatory approval It enables the reader to understand the opportunities and challenges in developing products and how risks can be mitigated Over the last 25 years expertise in this area has declined whilst drug delivery systems for other administration routes have developed significantly The advantages offered by transdermal and topical drug delivery remain compelling for sectors including the pharmaceutical industry personal care and cosmetics This text addresses the dearth of expertise and discusses how skin can be a route of delivery and the processes in formulation development but how such an application is very different to that used for oral IV and other administration routes Key Features Presents a practical guide for both industry and academia Focuses on and draws together the

fundamental principles behind transdermal and topical drug delivery Illustrates the practicalities of formulation design using key case studies Gives an understanding of the skin as a route of delivery and how formulation development for such application differs from that for other administration routes *Parenteral Medications, Fourth Edition* Sandeep Nema, John D. Ludwig, 2019-07-19 Parenteral Medications is an authoritative comprehensive reference work on the formulation and manufacturing of parenteral dosage forms effectively balancing theoretical considerations with practical aspects of their development Previously published as a three volume set all volumes have been combined into one comprehensive publication that addresses the plethora of changes in the science and considerable advances in the technology associated with these products and routes of administration Key Features Provides a comprehensive reference work on the formulation and manufacturing of parenteral dosage forms Addresses changes in the science and advances in the technology associated with parenteral medications and routes of administration Includes 13 new chapters and updated chapters throughout Contains the contributors of leading researchers in the field of parenteral medications Uses full color detailed illustrations enhancing the learning process The fourth edition not only reflects enhanced content in all the chapters but also highlights the rapidly advancing formulation processing manufacturing parenteral technology including advanced delivery and cell therapies The book is divided into seven sections Section 1 Parenteral Drug Administration and Delivery Devices Section 2 Formulation Design and Development Section 3 Specialized Drug Delivery Systems Section 4 Primary Packaging and Container Closure Integrity Section 5 Facility Design and Environmental Control Section 6 Sterilization and Pharmaceutical Processing Section 7 Quality Testing and Regulatory Requirements **Nonclinical Statistics for Pharmaceutical and Biotechnology Industries** Lanju Zhang, 2016-01-13 This book serves as a reference text for regulatory industry and academic statisticians and also a handy manual for entry level Statisticians Additionally it aims to stimulate academic interest in the field of Nonclinical Statistics and promote this as an important discipline in its own right This text brings together for the first time in a single volume a comprehensive survey of methods important to the nonclinical science areas within the pharmaceutical and biotechnology industries Specifically the Discovery and Translational sciences the Safety Toxicology sciences and the Chemistry Manufacturing and Controls sciences Drug discovery and development is a long and costly process Most decisions in the drug development process are made with incomplete information The data is rife with uncertainties and hence risky by nature This is therefore the purview of Statistics As such this book aims to introduce readers to important statistical thinking and its application in these nonclinical areas The chapters provide as appropriate a scientific background to the topic relevant regulatory guidance current statistical practice and further research directions **ISPE Good Practice Guide** Ispe, 2019-03-25 **Process Validation for Manufacturing of Biologics and Biotechnology Products** Fred Brown, Anthony S. Lubiniecki, 2003 Attempting to fill the gap Regulatory documents and inspections have put increasing emphasis on process validation for all types of products including biological and biotechnological ones Until now no

description of a process validation for complex biological processes exists let alone any concrete suggestion how to attain it this book however attempts to fill the gap Taking the current state of scientific practice in process validation as a starting point this volume portrays the expectations of the regulatory community and provides detailed examples of how various types of biological and biotechnological processes could be validated Considering the sizeable difficulties in designing a single method of process validation suitable for all types of processes and products the authors discuss the implications and present many possible routes to a successful validation process
