of writing code With that said a healthy familiarity of the computer is helpful as is the willingness and inquisitive curiosity to look beyond this book for certain answers The majority of Arduino users just want to get things done and often don't care about the little details they just want their projects to work I understand this as I am one of those people I first discovered programmable microcontrollers when I was an art student and at the time art school was not generally the most conducive environment for learning how to write code and wire up motors at least it wasn't before the Arduino came along Likewise I was never one for a love of mathematics which thankfully is not a prerequisite to deeply enjoy the process of writing code
