**National Geographic Almanac 2020** National Geographic,2019-08-27 Provides the latest information on a wide range of topics including animals culture geography the environment history and science Planning and Housing in the Rapidly Urbanising World Paul Jenkins,Harry Smith,Ya Ping Wang,2006-11-21 Written specifically as a teaching text and authored by a team of leading academics in the field this is the first book to bring together the key issues of rapid urbanisation with approaches to planning and housing Outlining and explaining core concepts from informal settlements to sustainability it focuses on the rapid urbanization of developing countries with case studies from Latin America Asia and Sub Saharan Africa The impact of rapid urbanization and associated globalization on land use and housing is described and analyzed with reference to the particular issues of poverty health and the environment of these areas Providing an accessible introduction to the key issues as well as enhancing current theoretical debates and exploring practical applications this book is an essential resource for students and researchers in this area **The Routledge Handbook of Tourism and the Environment** Andrew Holden,David A. Fennell,2013 This handbook explores and critically evaluates the debates and controversies inherent to tourism s relationship with nature especially pertinent at a time of major re evaluation of our relationship with the environment as a consequence of the environmental problems we now face *Contemporary Models for Pro-Poor Housing in Urban Sub-Saharan Africa* Lovemore Chipungu,Hangwelani Hope Magidimisha-Chipungu,Joseph Kamuzhanje,2026-01-13 The proportion of the world s urban population is expected to increase to about 57% by 2050 and the share of Africa s urban population is project to increase to 60% by the same year As a result of this phenomenal growth in urban population urbanization and urban poverty have begun to dominate the development discourse again after years of focusing on rural development Housing is a crucial issue for the urban poor who often lack land to build their own houses or access to financing that would allow them to purchase or build homes and are frequently concentrated in informal settlements with insufficient access to infrastructure health and education services Furthermore housing provision has largely fallen to central governments and policy has largely overlooked the capacity of the urban poor as individuals and communities to provide housing for themselves This book engages these challenges and assumptions offering insight into political economic environmental and financial frameworks that can help facilitate adequate housing options Drawing on examples from case studies across sub Saharan Africa these contributions center the urban poor in initiatives to develop housing infrastructure offering lessons for researchers and governments looking to address an ever escalating housing crisis

**Outdoor Recreation in American Life** H. Ken Cordell,1999 Here is an ongoing comprehensive assessment of trends current situations and the likely future of outdoor recreation supply and demand for the U S Readers can examine new and different aspects of the national demand its resemblance to the past and trends in the supply of outdoor recreation opportunities submitted from the private and public sectors The technological consumption driven urban society of today

demands a different mix of recreational pursuits and services and places a much heavier demand on our rich natural resources

**Urban Soils** Rattan Lal, B. A. Stewart, 2017-10-18 Globally 30% of the world population lived in urban areas in 1950 54% in 2016 and 66% projected by 2050 The most urbanized regions include North America Latin America and Europe Urban encroachment depletes soil carbon and the aboveground biomass carbon pools enhancing the flux of carbon from soil and vegetation into the atmosphere Thus urbanization has exacerbated ecological and environmental problems Urban soils are composed of geological material that has been drastically disturbed by anthropogenic activities and compromised their role in the production of food aesthetics of residential areas and pollutant dynamics Properties of urban soils are normally not favorable to plant growth the soils are contaminated by heavy metals and are compacted and sealed Therefore the quality of urban soils must be restored to make use of this valuable resource for delivery of essential ecosystem services e.g. food water and air quality carbon sequestration temperature moderation biodiversity Part of the Advances in Soil Sciences Series Urban Soils explains properties of urban soils assesses the effects of urbanization on the cycling of carbon nitrogen and water and the impacts of management of urban soils soil restoration urban agriculture and food security evaluates ecosystem services provisioned by urban soils and describes synthetic and artificial soils
