 - Sub-process Task
 - Call Activity Task
 - Event Task
 - Intermediate Task
 - End Task

- Boundary Marker**: Defines the boundary of an activity.
- Start Marker**: In the start event, it is the start event of an activity.
- End Marker**: In the end event, it is the end event of an activity.

Conversations

- A Conversation defines a set of logically related tasks and/or sub-processes that interact with a system or sub-process.
- A Conversation is a unit of work that logically belongs together. It might contain a specified transition activity.
- A Conversation can contain sub-conversations and participants.

Gateways

- Exclusive Gateway**: When getting to a gateway, the process flow is exactly one of the outgoing branches. When leaving, it splits the outgoing branch in exactly one outgoing flow.
- Parallel Gateway**: A process flow is splitting into two or more flows. When leaving, it splits the outgoing branch in two or more outgoing flows.
- Inclusive Gateway**: When getting to a gateway, at least one of the outgoing flows is taken. When leaving, it splits the outgoing branch in two or more outgoing flows.
- Complex Gateway**: When getting to a gateway, the process flow is exactly one of the outgoing branches. When leaving, it splits the outgoing branch in two or more outgoing flows.
- Event-based Gateway**: When getting to a gateway, the process flow is exactly one of the outgoing branches. When leaving, it splits the outgoing branch in two or more outgoing flows.
- Exclusive Event-based Gateway**: When getting to a gateway, the process flow is exactly one of the outgoing branches. When leaving, it splits the outgoing branch in two or more outgoing flows.
- Parallel Event-based Gateway**: When getting to a gateway, the process flow is exactly one of the outgoing branches. When leaving, it splits the outgoing branch in two or more outgoing flows.
- Inclusive Event-based Gateway**: When getting to a gateway, the process flow is exactly one of the outgoing branches. When leaving, it splits the outgoing branch in two or more outgoing flows.

Data

- Data Object**: A Data Object represents a piece of information, e.g., a file or a document.
- Data Store**: A Data Store represents a collection of information, e.g., a database.
- Data Input/Output**: A Data Input/Output represents a flow of information between a process and a data store.
- Data Store Reference**: A Data Store Reference represents a reference to a data store.
- Data Store Reference**: A Data Store Reference represents a reference to a data store.

Bpmn 2 0 Business Process Model And Notation:

BPMN 2.0 Thomas Allweyer,2016-04-07 BPMN Business Process Model and Notation is the established standard for business process modeling Only a few years after its first publication it has gained widespread adoption in practice All important modeling tools support BPMN diagramming It is possible to create business oriented diagrams but also technical models for process execution in business process management systems BPMS This book provides a stepwise introduction to BPMN using many examples close to practice Starting with the basic elements for modeling sequence flow all BPMN 2 0 diagrams are presented and discussed in detail You will gain a profound understanding of the complete notation and you will be able to make correct use of the different language elements In the second edition a collection of useful modeling patterns has been added These patterns provide best practice solutions for typical problems arising in the practice of process modeling

BPMN 2.0 Handbook First Edition Layna Fischer,2010-11-01

BPMN Modeling and Reference Guide Stephen A. White,Derek Miers,2008-01-01 Business Process Modeling Notation BPMN is a standard graphical modeling representation for business processes It provides an easy to use flow charting notation that is independent of the implementation environment An underlying rigor supports the notation facilitating the translation of business level models into executable models that BPM Suites and workflow engines can understand Over recent years BPMN has been widely adopted by Business Process Management BPM related products both the Business Process Analysis and Modeling tool vendors and the BPM Suites This book is for business users and process modeling practitioners alike Part I provides an easily understood introduction to the key components of BPMN put forward in a user friendly fashion Starting off with simple models it progresses into more sophisticated patterns Exercises help cement comprehension and understanding with answers available online Part II provides a detailed and authoritative reference on the precise semantics and capabilities of the standard

A Rigorous Semantics for BPMN 2.0 Process Diagrams Felix Kossak,Christa Illibauer,Verena Geist,Jan Kubovy,Christine Natschläger,Thomas Ziebermayr,Theodorich Kopetzky,Bernhard Freudenthaler,Klaus-Dieter Schewe,2015-02-04 This book provides the most complete formal specification of the semantics of the Business Process Model and Notation 2 0 standard BPMN available to date in a style that is easily understandable for a wide range of readers not only for experts in formal methods but e g also for developers of modeling tools software architects or graduate students specializing in business process management BPMN issued by the Object Management Group is a widely used standard for business process modeling However major drawbacks of BPMN include its limited support for organizational modeling its only implicit expression of modalities and its lack of integrated user interaction and data modeling Further in many cases the syntactical and in particular semantic definitions of BPMN are inaccurate incomplete or inconsistent The book addresses concrete issues concerning the execution semantics of business processes and provides a formal definition of BPMN process diagrams which can serve as a sound basis for further extensions i e in the form of horizontal refinements of the core

language To this end the Abstract State Machine ASMs method is used to formalize the semantics of BPMN ASMs have demonstrated their value in various domains e.g. specifying the semantics of programming or modeling languages verifying the specification of the Java Virtual Machine or formalizing the ITIL change management process This kind of improvement promotes more consistency in the interpretation of comprehensive models as well as real exchangeability of models between different tools In the outlook at the end of the book the authors conclude with proposing extensions that address actor modeling including an intuitive way to denote permissions and obligations integration of user centric views a refined communication concept and data integration

Handbook on Business Process Management 1 Jan vom Brocke, Michael Rosemann, 2014-08-29 Business Process Management BPM has become one of the most widely used approaches for the design of modern organizational and information systems The conscious treatment of business processes as significant corporate assets has facilitated substantial improvements in organizational performance but is also used to ensure the conformance of corporate activities This Handbook presents in two volumes the contemporary body of knowledge as articulated by the world's leading BPM thought leaders This first volume focuses on arriving at a sound definition of BPM approaches and examines BPM methods and process aware information systems As such it provides guidance for the integration of BPM into corporate methodologies and information systems Each chapter has been contributed by leading international experts Selected case studies complement their views and lead to a summary of BPM expertise that is unique in its coverage of the most critical success factors of BPM The second edition of this handbook has been significantly revised and extended Each chapter has been updated to reflect the most current developments This includes in particular new technologies such as in memory data and process management social media and networks A further focus of this revised and extended edition is on the actual deployment of the proposed theoretical concepts This volume includes a number of entire new chapters from some of the world's leading experts in the domain of BPM
