Brain Oscillations in Human Communication Anne Keitel,Johanna Rimmele,Sophie Molholm,Joachim

Gross,2018-04-20 Brain oscillations or neural rhythms reflect widespread functional connections between large scale neural networks as well as within cortical networks As such they have been related to many aspects of human behaviour An increasing number of studies have demonstrated the role of brain oscillations at distinct frequency bands in cognitive sensory and motor tasks Consequentially those rhythms also affect diverse aspects of human communication On the one hand this comprises verbal communication a field where the understanding of neural mechanisms has seen huge advances in recent years Speech is inherently organised in a rhythmic manner For example time scales of phonemes and syllables but also formal prosodic aspects such as intonation and stress fall into distinct frequency bands Likewise neural rhythms in the brain play a role in speech segmentation and coding of continuous speech at multiple time scales as well as in the production of speech On the other hand human communication involves widespread and diverse nonverbal aspects where the role of neural

rhythms is far less understood This can be the enhancement of speech processing through visual signals thought to be guided via brain oscillations or the conveying of emotion which results in differential rhythmic modulations in the observer Additionally body movements and gestures often have a communicative purpose and are known to modulate sensorimotor rhythms in the observer This Research Topic of *Frontiers in Human Neuroscience* highlights the diverse aspects of human communication that are shaped by rhythmic activity in the brain Relevant contributions are presented from various fields including cognitive and social neuroscience neuropsychiatry and methodology As such they provide important new insights into verbal and non verbal communication pathological changes and methodological innovations

The Rules of Italian Burraco Giovanni Tamaro, 2023-11-21 Burraco today is considered a kind of panacea capable of resolving many moments in social life For example an evening among friends a rainy Saturday afternoon a day at the beach that's just too sunny a train journey etc The reason for the boom in this game is probably due to its structure a game with rather simple rules but also possessing very interesting technical relational and competitive aspects The fact that it is structured as a team game makes it diverse

and enjoyable compared to many other card games The challenge clears the mind of negative thoughts and immerses the players in a relationship based life that is almost always pleasant The classic game is played with four players not always easy to find yet two are enough to play one of the most beautiful versions of Burraco It takes little to get passionate about Burraco and gradually with experience sophisticated gaming strategies are put into action turning it from a simple hobby into a true passion Today it s also one of the most popular games online where every day many users both professionals and amateurs enjoy playing often leading to new friendships There are several variants of the game Burraco In this book we will cover the rules of traditional Italian Burraco for four players and its variants for two players for three players for five players for six players The main differences between Italian Burraco and other variants such as International Burraco Burraco Revolution and Burraco Champion are also explained The intended audience for this book is anyone young and old who is approaching the game of Burraco for the first time The topics are presented in a clear and simple manner divided into sections that facilitate navigation within the text The game of Burraco appeals to a wide range of ages in fact it often becomes a point of contact between two worlds the grandfather who plays Burraco with his grandson All of this is possible through its two strengths the playful aspect as it entertains and captivates and the educational aspect as it develops skills in concentration prediction respect for rules reflection problem solving etc which are fully in line with the development of abilities and competencies that today s society demands from each of us This book has been translated using ChatGPT an advanced language model If you notice any errors inaccuracies or if you have suggestions for improvement please contact us at the email address provided on the last page of the book We appreciate your collaboration and are grateful for any contributions that can enhance the quality of the translation Thank you for your attention and support Happy reading
