Investment Appraisal Uwe Götze, Deryl Northcott, Peter Schuster, 2015-03-18 This book provides an introduction to investment appraisal and presents a range of methods and models some of which are not widely known or at least not well covered by other textbooks Each approach is thoroughly described evaluated and illustrated using examples with its assumptions and limitations analyzed in terms of their implications for investment decision making practice Investment decisions are of vital importance to all companies Getting these decisions right is crucial but due to a complex and dynamic

business environment this remains a challenging management task Effective appraisal methods are valuable tools in supporting investment decision making As organisations continue to seek a competitive edge it is increasingly important that management accountants and strategic decision makers have a sound knowledge of these tools Financial Crises Stelios Markoulis,2021-01-14 This book on financial crises is written at a time when the whole world is facing another crisis a different one this time one that is related to our health as well as the economy in a painful manner The first chapter of this book focuses on the economic effects of this crisis with particular emphasis on the financial sector The remainder of the book presents a selection of readings related to the GFC These touch upon issues such as corporate governance the effect of the collapse of the Lehman Brothers on the net worth of financial and non financial firms securitization and why the alchemy did not work and finally a case study on Turkey and in particular the Turkish short term interest rates and exchange rates and their relationship to political developments *Transforming Financial Institutions* Joerg Ruetschi,2022-01-31 Transform your financial organisation s formula for value creation with this insightful and strategic approach In *Transforming Financial Institutions through Technology Innovation and Operational Change* visionary turnaround leader Joerg Ruetschi delivers a practical and globally relevant methodology and framework for value creation at financial institutions The author demonstrates how financial organisations can combine finance strategy with asset liability and technology management to differentiate their services and gain competitive advantage in a ferocious industry In addition to exploring the four critical areas of strategic and competitive transformation financial analysis valuation modeling and stress the book includes Explanations of how to apply the managerial fundamentals discussed in the book in the real world with descriptions of the principles for reorganization wind down and overall value creation An analysis of the four key emerging technologies in the financial industry AI blockchain software and infrastructure solutions and their transformational impact Real world case studies and examples on how financial institutions can be repositioned and rebuilt on a path of profitability Perfect for managers and decision makers in the financial services industry *Transforming Financial Institutions through Technology Innovation and Operational Change* is also required reading for regulators tech firms and private equity and venture capital funds **Principal-Agency-Theory in Mergers and Acquisitions** Tobias Marsch,2015-07-01 Seminar paper from the year 2015 in the subject Business economics Controlling grade 2 0 language English abstract In times of globalization and increasing competition there are a lot of new big challenges for companies and their chief executive officers CEO High cost pressure new competitors and the desire for a growing shareholder value are the challenges of global competitiveness After exhausting all opportunities of internal optimization potentials the only way for many companies to grow or to ensure survival is to merge with other companies The CEOs of the companies try to manage the growing requirements by extending the business portfolios or even acquiring whole companies So in 2013 in Germany the number of Mergers Acquisitions M A was the highest for five years A study of the Boston Consulting Group says that from 1988 to 2010 more than 26 000

transactions were realized This figure confirms the high importance of that method But are M A the panpharmacon to handle the changing global markets and to ensure the prospective success of the companies If you have a detailed look at the results you can recognize that a large number of executed M A did not satisfy the expectations or even destroy value The risks are all too frequent just underestimated Often the failure is due to information asymmetry of the acting partners This effect is called the principal agency problem What is the reason for that and why do so many M A fail What are the real goals of the participants of such an M A process Do all participants pursue the same objectives or are there maybe any other intentions in the case The following assignment deals with the M A process in relation to the principal agency theory and shows some solution approaches to avoid bad surprises for all participating companies after an executed M A process *Financial Theory and Corporate Policy* Thomas E. Copeland, John Fred Weston, 1988 A recognized classic *Financial Theory and Corporate Policy* is thoroughly updated in this third edition The authors provide a concise unified treatment of finance combining theory empirical evidence and applications Recent major contributions in financial literature are discussed and all current literature is summarized The book provides MBA and doctoral students with an excellent bridge to prevailing scholarship in finance **Management** ,1982 **Managerial Finance** John Fred Weston, Thomas E.
