CSCP Certification Exam ExamFOCUS Study Notes and Review Questions for the Supply Chain Professional 2015 Exam REVIEW, 2014-12-18. A supply chain is a network of retailers, distributors, transporters, storage facilities, and suppliers that participate in the sale, delivery, and production of a particular product. The concept of supply chain often involves backward integration, acquiring ownership of one's supply chain in the hope of reducing supplier power and thus reducing input costs. The four major functional components are demand planning, manufacturing planning, and scheduling, supply planning, transportation planning. The Certified Supply Chain Professional CSCP certification is essential for professionals involved in the areas of supplier and customer relations, international trade, the use of information technology to enable the supply chain, and physical logistics. Candidates must pass a 4-hour exam in order to earn the CSCP designation. The major topics covered included Supply Chain Management Fundamentals, Building Competitive Operations, Planning and Logistics, Managing Customer and Supplier Relationships, Using Information Technology to Enable Supply Chain Management. Officially CPIM focuses primarily on manufacturing and provides an in-depth view of materials management, master scheduling, production planning, forecasting, and quality improvement within an organization, while CSCP takes a broader view to encompass all steps throughout the supply chain.
