Collaborative Governance And Information Technology:

Routledge Handbook on Information Technology in Government Yu-Che Chen, Michael J. Ahn, 2017-02-17 The explosive growth in information technology has ushered in unparalleled new opportunities for advancing public service. Featuring 24 chapters from foremost experts in the field of digital government, this Handbook provides an authoritative survey of key emerging technologies, their current state of development and use in government, and insightful discussions on how they are reshaping and influencing the future of public administration. This Handbook explores key emerging technologies, i.e. big data, social media, Internet of Things (IOT), GIS, smart phones, mobile technologies, and their impacts on public administration. The impacts of the new technologies on the relationships between citizens and their governments, with the focus on collaborative governance. Key theories of IT innovations in government on the interplay between technological innovations and public administration. The relationship between technology and democratic accountability and the various ways of harnessing the new technologies to advance public value. Key strategies and conditions for fostering success in leveraging technological innovations for public service. This Handbook will prove to be an invaluable guide and resource for students, scholars, and practitioners interested in this growing field of technological innovations in government. Collaborating for Digital Transformation Koen Verhoest, Gerhard Hammerschmid, Lise H. Rykkja, Erik H. Klijn, 2024-01-18 This is an open access title available under the terms of a CC BY-NC-ND 4.0 License. It is free to read, download, and share on Elgaronline.com. As worldwide institutions acknowledge the necessity of digital, open, and collaborative governments, this timely book offers a comprehensive exploration of digital transformation, intergovernmental collaboration, collaborative governance, and public sector innovation. **Wiki Government** Beth Simone Noveck, 2009-08-01 Collaborative democracy: government with the people is a new vision of governance in the digital age. Wiki Government explains how to translate the vision into reality. Beth Simone Noveck draws on her experience in creating Peer to Patent, the federal government's first social networking initiative to show how technology can connect the expertise of the many to the power of the few. In the process, she reveals what it takes to innovate in government. Launched in 2007, Peer to Patent connects patent examiners to volunteer scientists and technologists via the web. These dedicated but overtaxed officials decide which of the million-plus patent applications currently in the pipeline to approve. Their decisions help determine which start-up pioneers a new industry and which disappears without a trace. Patent examiners have traditionally worked in secret, cut off from essential information and racing against the clock to rule on lengthy technical claims. Peer to Patent broke this mold by creating online networks of self-selecting citizen experts and channeling their knowledge and enthusiasm into forms that patent examiners can easily use. Peer to Patent shows how policymakers can improve decisionmaking by harnessing networks to public institutions. By encouraging coordinating and structuring citizen participation, technology can make government both more open and more effective at solving today's complex social and economic problems. Wiki Government describes how this model can be applied.

in a wide variety of settings and offers a fundamental rethinking of effective governance and democratic legitimacy for the twenty first century

Governance and Information Technology Viktor Mayer-Schonberger, David Lazer, 2007-08-31 Accompanied by short case studies from around the world which cover such topics as electronic government efforts in Singapore and Switzerland the US EPA s effort to solicit input on planned regulations over the Internet and online activism cyberprotesting globalization Australian contributor *Collaborative Governance in the United States and Korea* Yong-dök Chōng, 2009

Information Technology for Manufacturing Systems II Qi Luo, 2011-06-10 Selected peer reviewed papers from the 2011 International Conference on Information Technology for

Manufacturing Systems ITMS 2011 Shanghai China May 7 8 2011 **Organizational Integration of Enterprise Systems and Resources: Advancements and Applications** Varajão, João Eduardo Quintela Alves de Sousa, Cruz-Cunha, Maria Manuela, Trigo, Antonio, 2012-06-30 The topic of Enterprise Information Systems EIS is having an increasingly relevant strategic impact on global business and the world economy and organizations are undergoing hard investments in search of the rewarding benefits of efficiency and effectiveness that these ranges of solutions promise Organizational Integration of Enterprise Systems and Resources Advancements and Applications show that EIS are at the same time responsible for tremendous gains in some companies and tremendous losses in others Therefore their adoption should be carefully planned and managed This title highlights new ways to identify opportunities and overcome trends and challenges of EIS selection adoption and exploitation as it is filled with models solutions tools and case studies The book provides researchers scholars and professionals with some of the most advanced research solutions and discussions of Enterprise Information Systems design implementation and management **Empowering Open and Collaborative Governance** Yannis Charalabidis, Sotirios Koussouris, 2012-03-14 The use of information and communication technologies to support public administrations governments and decision makers has been recorded for more than 20 years and dubbed e Government Moving towards open governance roadmaps worldwide electronic participation and citizen engagement stand out as a new domain important both for decision makers and citizens and over the last decade there have been a variety of related pilot projects and innovative approaches With contributions from leading researchers Charalabidis and Koussouris provide the latest research findings such as theoretical foundations principles methodologies architectures technical frameworks cases and lessons learnt within the domain of open collaborative governance and online citizen engagement The book is divided into three sections Section one Public Policy Debate Foundations lays the foundations regarding processes and methods for scoping planning evaluating and transforming citizen engagement The second section Information and Communication Technologies for Citizen Participation details practical approaches to designing and creating collaborative governance infrastructures and citizen participation for businesses and administrations Lastly the third section on Future Research Directions of Open Collaborative ICT enabled Governance provides a constructive critique of the developments in the past and presents prospects regarding future challenges and research directions The book is mainly written for academic researchers and graduate students working in the computer social political and management sciences Its audience includes researchers and practitioners in e Governance public administration officials policy and decision makers at the local national and international level engaged in the design and creation of policies and services and ICT professionals engaged in e Governance and policy modelling projects and solutions **The Use of Collaborative Technology in Collaboration** Xian Gao, 2020 The use of information technology is now ubiquitous in local government Collaboration on the other hand has been generally accepted as imperative to relieve resource dependence and better fulfill public responsibilities Considering the

amount of IT spending as well as collaboration projects in local government decision makers need to understand how technology particularly collaborative tools can be used to foster better collaboration performance within their government

Two research fields inspired this study In the e government field the research on IT adoption antecedents and IT performance explained the inclusion of the organizational and technological factors in the conceptual framework In the collaboration field findings of the collaborative governance frameworks provided support for the distinct examination of collaboration process and collaboration outcomes Also they confirmed the inclusion of leadership planning and stakeholder involvement as conditional factors Moreover studies on virtual teams helped explain the incorporation of face to face communication as a moderating factor of the hypothesized relationships This study uses the exploratory sequential mixed methods design The case study method with both quasi experiment and interview data collection provided fruitful evidence of the predicted relationships in interpersonal collaboration context and suggested insights into developing contextual hypotheses The MTurk survey gathered empirical experience and examined the causality predicted in the framework in interpersonal and interdepartmental collaboration settings The findings of this dissertation indicated that the use of collaborative technology could improve interpersonal and interdepartmental collaboration outcomes through facilitating interactions among participants This relationship will be stronger when communication is collaborative and weaker if it is isolated Besides the findings demonstrated that the magnitude and direction of this indirect effect depended on the level of leadership support face to face communication and task technology fitness This dissertation makes theoretical advancements to e government and collaboration research Also it offers practical recommendations to public managers on how to strategically manage organizational efforts at different stages of collaborative technology use to achieve a more interactive collaboration process and better collaboration performance
