### MULTIPLE CHOICE

1. Which statement best describes the Bormann-Likens controlled experiment in forest valleys in New Hampshire that compared water flowing out of deforested areas to undisturbed areas?
- The deforested area was greater in volume by 30 to 40%.
  - The deforested area was less in volume by 30 to 40%.
  - The deforested area had more soil nutrients dissolved in the water.
  - The deforested area was less in volume by 30 to 40% *and* had fewer soil nutrients dissolved in the water.
  - The deforested area was greater in volume by 30 to 40% *and* had more soil nutrients dissolved in the water.

4. When scientists are testing ideas to determine facts, they
- follow a specific set of logical steps.
  - report observations to the scientific community without data collection.
  - use different steps that are unique to each scientist.
  - use only mathematical modeling.
  - first ask fellow scientists at annual meetings what steps to take.

Foundation's Public Understanding of Science and Technology Program      **Friedland/Relyea Environmental Science for AP\*** Andrew Friedland, Rick Relyea, David Courard-Hauri, 2011-02-15 Friedland Relyea Environmental Science for AP was specifically developed to meet the requirements of the AP Environmental Science course and the needs of its students and teachers. This highly anticipated new textbook explores the science behind environmental science and involves students with the fundamental concepts and findings that inform environmental decision making at all levels from personal choices to national and international policy. This site will be the source for periodic updates on this exciting project as it draws closer to publication. For the latest developments or if you would like to be a part of this project as a reviewer or class tester please contact Carlise Stembridge      *Environmental Science* Richard Wright, Richard T. Wright, 2005 *Environmental Science: Toward a Sustainable Future* 9 e focuses on the question: What will it take to move our civilization toward a long-term sustainable relationship with the natural world? Its goal is to engage and inform students so they can critically evaluate environmental issues and make informed decisions about their environment. Three main categories define how the author works to achieve this goal: Critical thinking, Applications, Resources for instructors and students      **Environmental Science: Foundations and Applications** Andrew Friedland, Rick Relyea, David Courard-Hauri, 2011-02-25 Watch a video clip and view sample chapters at [www.whfreeman.com/friedlandpreview](http://www.whfreeman.com/friedlandpreview). Created for non-majors courses in environmental science, environmental studies, and environmental biology. *Environmental Science: Foundations and Applications* emphasizes critical thinking and quantitative reasoning skills. Students learn how to analyze graphs, measure environmental impact on various scales, and use simple calculations to understand key concepts. With a solid understanding of science fundamentals and how the scientific method is applied, students are able to evaluate information objectively and draw their own conclusions. The text equips students to interpret the wealth of data they will encounter as citizens, professionals, and consumers      **Visualizing Environmental Science** Linda R. Berg, David M. Hassenzahl, Mary Catherine Hager, 2010-09-22 The new third edition provides environmental scientists with an approach that focuses on visuals rather than excessive content. The streamlined coverage discusses the basic science so students walk away with a strong understanding of the facts. New Think Critically and Data Interpretation features encourage them to analyze visuals and graphs to place information in context. The illustrations have been improved, and additional opportunities to conduct real data analysis have been added. The What a Scientist Sees feature also gives environmental scientists a real-world perspective of how a concept or phenomenon is applied in the field      *Environmental Science* Eldon D. Enger, Bradley F. Smith, 2009-02-18 This full-color introductory environmental science text is known for being concise, conceptual, and value-priced. The approach and reading level cover the basic concepts without overloading students with too much detail. The authors reinforce the text's central theme of interrelationships by providing a historical perspective, information on economic and political realities, discuss the role of different social experiences, and integrate this with the crucial science to describe the natural world and how we affect it.

Environmental Science William P. Cunningham, Mary Ann Cunningham, Barbara Woodworth Saigo, 2003-03 This book is intended for use in a one or two semester course in environmental science human ecology or environmental studies at the college or advanced placement high school level Because most students who will use this book are freshman or sophomore nonscience majors the authors have tried to make the text readable and accessible without technical jargon or a presumption of prior science background At the same time enough data and depth are presented to make this book suitable for many upper division classes and a valuable resource for students who will keep it in their personal libraries after their formal studies are completed The goal of this book is to provide an up to date introductory view of essential themes in environmental science along with emphasis on details and case studies that will help students process and retain the general principles

**Environment** Manuel Molles, Brendan Borrell, 2016-12-22 Written by bestselling author Manuel Molles and acclaimed science journalist Brendan Borrell this new textbook gives non major students the scientific foundation they need to understand environmental issues and think critically about possible solutions Molles and Borrell make clear the connections between research and real world problems with a science issues solutions framework for each chapter This unique approach reinforces a positive solutions based framework for the science empowering students to feel that they can have an impact on preserving biodiversity protecting natural resources addressing pollution hazards confronting climate change and more Environment Science Issues Solutions is accompanied by its own dedicated version of LaunchPad an online course space bringing together all of the book s teaching and learning media including graphing exercises assignable video activities and more Together the text and LaunchPad provide a seamless learning experience for students and a reliable assessment mechanism for instructors and programs
