## Need to know: Life Cycle Assessment (LCA)

**What is a Life Cycle Assessment (LCA)?**

LCA is a tool that measures the environmental footprint of a product or service over its life.

LCA provides information to help businesses understand impacts and communicate their environmental message.

Environmental goals and strategies are more meaningful when they are based on facts, with the help of scientific and technical knowledge, from a range of sources. These allow the assessment what you need to know and where you need to act, and how you can make a real impact.

**Stages in a product's life cycle**

LCA calculates a snapshot of your product's environmental impacts, including:

- What goes into the product to make it (eg. energy and raw materials)
- What comes out when the product is used and disposed of (eg. water, noise, pollution, etc.)

To know the impact, we consider your product's environmental footprint.
