

# Coasting Theory Lectures Notes

Markus Hupfer and members of the team!

September 7, 2024

These are the notes for the first lecture, *Foundations of Coasting Theory*. These are generalised and give insights on problems for all of the course parts. Some are generalised, while some are specific to the course, the latter contribution to Coasting Theory and the needs of students and their (potential) employers. I also used several other sources for additional material, such as Part II course book of Cambridge on Coasting Theory and Navigation, given by Professor John Kitchin, and the new course notes from a Cambridge staff on Submarine Communications given by Professor Tim Gorman. I also included some material from other MIT courses, Applied Math for the Phys. Department, the last version of the notes is based on Hugh Hunt's course notes, "Graph-Based Control".

All credits go to those who did my best!
