Food Structures, Digestion and Health Mike Boland, Matt Golding, Harjinder Singh, 2014-03-24. This selection of key presentations from the Food Structures Digestion and Health conference is devoted to the unique and challenging interface between food science and nutrition and brings together scientists across several disciplines to address cutting-edge research issues. Topics include modeling of the gastrointestinal tract, effect of structures on digestion, and design for healthy foods. New knowledge in this area is vital to enable the international food industry to design a new generation of foods with enhanced health and sensory attributes. The multidisciplinary approach includes research findings by internationally renowned scientists and presents new research findings important and pertinent to professionals in both the food science and nutrition fields. Describes the science underpinning typical food structures, providing guidance on food structure in different conditions. Includes novel approaches to the design of healthy foods using real-world examples of applied research and design, written by top leaders in the area. Describes and validates model systems for understanding digestion and predicting digestion kinetics.

Instant Insights: Nutritional benefits of milk Dr Jan Geurts, Shane V. Crowley, Dr James A. O'Mahony, Patrick F. Fox, Young W. Park, Prof Michael Gänzle, 2023-02-21. This collection features four peer-reviewed reviews on the nutritional benefits of milk. The first chapter highlights the important role of milk and dairy products in human diets due to the amount of energy calories they provide and their ability to compensate for foods in the diet with lesser nutritional value. The chapter also reviews the dairy matrix concept and how this matrix can influence human physiology. The second chapter provides an overview of major and minor milk proteins, including caseins, whey proteins, and indigenous milk enzymes. The chapter discusses a selection of milk protein products which are produced on an industrial scale to support human health and growth, such as the use of whey protein in infant formula and dietary supplements. The third chapter reviews current knowledge on bioactive components existing in cow's milk and colostrum, their biological and nutritional functionalities, as well as how these components can be exploited for the benefit of human health and physiological metabolism function. The final chapter provides an overview of the nutritional properties of dairy carbohydrates and major glycoproteins in cow's milk. The chapter considers the contribution of lactose as a substrate for beneficial colonic fermentation to short-chain fatty acids, as well as the importance of glycoproteins in infant diets.

Milk and Dairy Products as Functional Foods Ara Kanekanian, 2014-04-09. There continues to be strong interest within the food industry in developing new products which offer functional health

benefits to the consumer The premium prices that can be charged make these added value products lucrative for manufacturers and they are also commercially popular Dairy foods are central to this sector they are good delivery systems for functional foods yoghurts milk drinks spreads and are also rich in compounds which can be extracted and used as functional ingredients in other food types Milk and Dairy Products as Functional Foods draws together a wealth of information regarding the functional health benefits of milk and dairy products It examines the physiological role and the claimed health effects of dairy constituents such as proteins bioactive peptides conjugated linoleic acid CLA omega 3 fatty acids vitamin D and calcium These constituents have been shown to be for example anticarcinogenic anti inflammatory antihypertensive hypocholesterolemic immune modulating and antimicrobial This book examines the evidence for these claims and investigates practical approaches for utilising these attributes The book is aimed at dairy scientists and technologists in industry and academia general food scientists and technologists microbiologists and nutritionists together with all those involved in the formulation and production of functional food products **Bioactive components in cow's**
