### Exam-style questions

The mark schemes, suggested answers and comments that appear here were written by the author(s). In examinations, the way marks would be awarded to answers like these may be different.

#### Notes about mark schemes

**A** or **accept** indicates an alternative acceptable answer.

**R** = reject. This indicates a possible answer that should be rejected.

**:** The **bold** semicolon indicates the award of 1 mark.

**/** This indicates an alternative answer for the same mark. The alternatives may be separated from the rest of the answer by commas.

**( )** Text in brackets is not required for the mark.

**Underlining** This is used to indicate essential word(s) that must be used to get the mark.

**AW** means 'alternative wording'. It is used to indicate that a different wording is acceptable provided the essential meaning is the same, and is used where students' responses are likely to vary more than usual.

**AVP** means 'additional valid point'. This means accept any additional points given by the student that are not in the mark scheme, provided they are relevant. **But accept only as many additional points as indicated by the bold semicolons**, e.g. **AVP ; ;** means award a maximum of 2 extra marks.

**ORA** means 'or reverse argument' and is used when the same idea could be expressed in the reverse way. For example: 'activity increases between pH2 and pH5 **ORA**' means accept 'activity decreases between pH5 and pH2'.

**max.** This indicates the maximum number of marks that can be given.
