MODULAR CONSTRUCTION

- There are many different ways to define the modular construction but one basic definition of modular construction can be given as follows:
- "Modular Construction is a pre-engineered process of making any structures or elements in a factory that is off-site and are delivered to the sites and assembled as large volumetric components or as substantial elements of any structures."
- It can also be defined as "A modular building is a pre-engineered structure that is flexible enough to satisfy virtually any requirement tougher than standard drywall construction, expandable, can be relocated and completely re-usable."

MODULAR CONSTRUCTION (CONT.)

- With increasing industrialization to the building industry, steadily larger parts of buildings are made up of prefabricated components

Architecture Ryan E. Smith, John D. Quale, 2017-03-16 Architects have been intrigued by prefabricated construction since the early twentieth century Recent advances in design engineering and manufacturing processes have led to a significant expansion in the use of pre assembled components which are fitted to finished structures on site Collectively such processes are becoming known as offsite construction A ground breaking text Offsite Architecture establishes the current and future state of thinking in this field A range of the most highly regarded thinkers and practitioners from around the globe share their ideas and practical findings on offsite prefabrication examining theory and practice opportunities and challenges successes and failures A timely response to the growing interest in this method the book provides the fundamental basis for a critical reflective approach to offsite architecture Contributions from both academics and professionals make Offsite Architecture required reading for practitioners as well as students taking courses in architecture prefabrication construction and engineering **Structural Design of Buildings** Feng Fu, David Richardson, 2024-07-25 Structural Design of Buildings
