There are three rules for writing a scientific name using the system. Analyze the information in Model 2 to complete the table below.

Rule 1: The scientific name is always written in 2 names, with the genus name written capitalized and the species name lowercase.

Rule 2: The scientific name is always written in Latin. If it is handwritten, it is written in a cursive or slanted font.

Rule 3: The first letter of the genus name is a capital letter.

13. The species is used to name the world. Why do you think Latin is used instead of a more popular language?

Yes, in early 1800s, the world was not as globalized as it is now. Latin was the common language for all people.

14. Using the system, would it be possible for two different species to have the same name?

No

15. In Linnaeus's time, classification was based on the appearance of organisms. This does the appearance of organisms such as shape and legs, shells and feathers, and pigmentation matter? What are the limitations of describing organisms by only their appearance?

Yes, many different-looking groups of organisms together.

For example, birds and bats are very different but they both fly. Only birds.

16. Considering advances in science, discuss with your group what might be a more reliable way to study organisms. List at least three additional ways to study organisms.

- Behavior
- Ways to obtain food
- Adaptation to environment
- DNA analysis
