Developing AI, IoT and Cloud Computing-based Tools and Applications for Women's Safety Parul Dubey, Gurpreet Singh Chhabra, Bui Thanh Hung, Umashankar Ghugar, 2024-12-06 In a world increasingly driven by technology this book explores the intersection of artificial intelligence AI IoT and Cloud Computing and women's safety highlighting the transformative potential of technology in safeguarding women's well-being in the physical and the digital world As the safety and security industry embraces technological advancements the need for inclusive and gender-centric solutions has become increasingly evident This reference book delves into this critical area showcasing the development of AI IoT and Cloud applications specifically tailored to address the unique safety challenges faced by women Provides a comprehensive exploration of how AI and related technologies are reshaping the future of women's safety Emphasizes the utilisation of AI to tackle the specific challenges women encounter in various contexts Introduces innovative solutions such as wearable technology AI-powered surveillance systems and mobile applications designed for emergency responses Discusses ethical implications of deploying technology for personal security and navigates the evolving legal landscape surrounding data privacy Bridges the gap between theoretical discussions and practical implementations offering a guide to developing technology for the improvement of women's safety It is an invaluable resource for professionals and researchers interested in the transformative role of AI IoT and Cloud in shaping the future of women's safety

Wearable Sensing and Intelligent Data Analysis for Respiratory Management Rui Pedro Paiva, Paulo de Carvalho, Vassilis Kilintzis, 2022-05-21 Wearable Sensing and Intelligent Data Analysis for Respiratory Management highlights the use of wearable sensing and intelligent data analysis algorithms for respiratory function management offering several potential and substantial clinical benefits The book allows for the early detection of respiratory exacerbations in patients with chronic respiratory diseases allowing earlier and therefore more effective treatment As such the problem of continuous non-invasive remote and real-time monitoring of such patients needs increasing attention from the scientific community as these systems have the potential for substantial clinical benefits promoting P4 medicine personalized participative predictive and preventive Wearable and portable systems with sensing technology and automated analysis of respiratory sounds and pulmonary images are some of the problems that are the subject of current research efforts hence this book is an ideal resource on the topics discussed Presents an up-to-date review and current trends and hot topics in the different sub-fields e.g. wearable technologies respiratory sound analysis lung image analysis etc Offers a comprehensive guide for any research starting to work in the field Presents the state of the art of each sub-topic where the main works in the literature is critically reviewed and discussed along with the main practices and techniques in each area

NASA Technical Memorandum, 1981 New Technologies, Development and Application VII Isak Karabegovic, Ahmed Kovačević, Sadko Mandzuka, 2024-07-27 This book features papers focusing on the implementation of new and future technologies which were presented at the International Conference on New Technologies Development

and Application Advanced Production Processes and Intelligent Systems held at the Academy of Science and Arts of Bosnia and Herzegovina in Sarajevo on 20-22 June 2024. It covers a wide range of future technologies and technical disciplines including complex systems such as Industry 4.0, robotics, mechatronics, systems automation, manufacturing, cyber-physical and autonomous systems, sensors, networks, control, energy, renewable energy sources, automotive and biological systems, vehicular networking and connected vehicles and intelligent transport, effectiveness and logistics systems, smart grids, nonlinear systems, power, social and economic systems, education and IoT. The book *New Technologies: Development and Application VII* is oriented toward Fourth Industrial Revolution (Industry 4.0), which implementation will improve many aspects of human life in all segments and lead to changes in business paradigms and production models. Further, new business methods are emerging, transforming production systems, transport, delivery and consumption, which need to be monitored and implemented by every company involved in the global market.

The Librarian's Idea Book Katherine Jean Harig, Judith Ann Harwood, Candace R. Benefiel, 1993. This collection of ideas for librarians should serve as a handy guide to the innovative and as a reference and research tool on major trends in library and information services over the past 10 years. The collection takes the best abstracts used in ALA Poster Sessions since their origin in 1982 and organises them for ready reference by topic and/or by key words. There are ideas for all types of libraries and professional specialities by some of the most prominent names in the field.

Recent Trends in Computational Intelligence Enabled Research Siddhartha Bhattacharyya, Paramartha Dutta, Debabrata Samanta, Anirban Mukherjee, Indrajit Pan, 2021-07-31. The field of computational intelligence has grown tremendously over that past five years thanks to evolving soft computing and artificial intelligent methodologies, tools and techniques for envisaging the essence of intelligence embedded in real life observations. Consequently, scientists have been able to explain and understand real life processes and practices which previously often remain unexplored by virtue of their underlying imprecision, uncertainties and redundancies and the unavailability of appropriate methods for describing the incompleteness and vagueness of information represented. With the advent of the field of computational intelligence, researchers are now able to explore and unearth the intelligence otherwise insurmountable embedded in the systems under consideration. Computational Intelligence is now not limited to only specific computational fields; it has made inroads in signal processing, smart manufacturing, predictive control, robot navigation, smart cities and sensor design, to name a few.

Recent Trends in Computational Intelligence Enabled Research: Theoretical Foundations and Applications explores the use of this computational paradigm across a wide range of applied domains which handle meaningful information. Chapters investigate a broad spectrum of the applications of computational intelligence across different platforms and disciplines, expanding our knowledge base of various research initiatives in this direction. This volume aims to bring together researchers, engineers, developers and practitioners from academia and industry working in all major areas and interdisciplinary areas of computational intelligence: communication systems, computer networks and soft

computing Provides insights into the theory algorithms implementation and application of computational intelligence techniques Covers a wide range of applications of deep learning across various domains which are researching the applications of computational intelligence Investigates novel techniques and reviews the state of the art in the areas of machine learning computer vision soft computing techniques
