

Exam 98-375: HTML5 Application Development Fundamentals – Skills Measured

Audience Profile

Candidates for this exam are seeking to prove core HTML5 client application development skills that will run on today's touch-enabled devices (PCs, tablets, and phones). Although HTML is often thought of as a web technology that is rendered in a browser to produce a UI, this exam focuses on using HTML5, CSS3, and JavaScript to develop client applications. Before taking this exam, candidates should have solid foundational knowledge of the topics outlined in the preparation guide, including CSS and JavaScript. It is recommended that candidates be familiar with the concepts of and have some hands-on experience with the related technologies, either by taking relevant training courses or by working with tutorials and samples available on MSDN and in Microsoft Visual Studio.

Skills Measured

NOTE: The bullets that appear below each of the skills measured are intended to illustrate how we are assessing that skill. This list is not definitive or exhaustive.

NOTE: In most cases, exams do NOT cover preview features, and some features will only be added to an exam when they are GA (General Availability).

Manage the application life cycle (20–25%)

Understand the platform fundamentals

- packaging and the runtime environment: app package, app container, credentials/permission sets, host process, leverage existing HTML5 skills and content for state/tablet applications

Manage the state of an application

- manage session state, app state, and persist state information; understand states of an application; understand the differences between local and session storage

Debug and test an HTML5-based, touch-enabled application

- touch gestures: understand which gestures you test on a device

Build the user interface (UI) by using HTML5 (25–30%)

Exam 98 375 Html5
