**Relationship Thinking** N. J. Enfield,2013-11-26 In Relationship Thinking N J Enfield outlines a framework for analyzing social interaction and its linguistic cultural and cognitive underpinnings by focusing on human relationships This is a naturalistic approach to human sociality grounded in the systematic study of real time data from social interaction in everyday life Many of the illustrative examples and analyses in the book are a result of

the author's long term field work in Laos Enfield promotes an interdisciplinary approach to studying language culture and mind building on simple but powerful semiotic principles and concentrating on three points of conceptual focus The first is human agency the combination of flexibility and accountability which defines our possibilities for social action and relationships and which makes the fission and fusion of social units possible The second is enchrony the timescale of conversation in which our social relationships are primarily enacted The third is human sociality a range of human propensities for social interaction and enduring social relations grounded in collective commitment to shared norms Enfield's approach cuts through common dichotomies such as cognitive versus behaviorist or public versus private arguing instead that these are indispensable sides of single phenomena The result is a set of conceptual tools for analyzing real time social interaction and linking it with enduring relationships and their social contexts The book shows that even or perhaps especially the most mundane social interactions yield rich insights into language culture and mind

**Being Religious** Mladen Turk, 2013-07-12 What makes us religious What is religion This book presents relevant research and theoretical proposals for evolutionary theories of religion and socially and ecologically adaptive theories of religion Most attempts to study religious behaviors through evolutionary biology and related disciplines are still very fragmentary Mladen Turk brings those theoretical approaches in dialogue with religious studies and theology through interpretation and critique that centers on revealing hidden theological assumptions and interpreting theoretical leaps of those approaches to religion In *Being Religious* Turk expounds understanding of religion as a complex interplay of various capacities arising from and influencing our biological and cultural makeup Our religious behaviors can influence our relationship towards each other and towards our environment in significant ways He shows how some aspects of complex religious behaviors can be understood better in light of human cognition and evolutionary biology At the same time he interprets this knowledge as being preliminary and at times inadequate in its claims of completeness and exhaustiveness because religious behaviors are niched within other religious behaviors and dependent on factors that various mono causal theoretical approaches cannot fully conceptualize

[Anthropologischer Anzeiger](#), 2004 [Encyclopedia of Science and Religion](#) Jacobus Wentzel Van Huyssteen, 2003 A multidisciplinary approach that addresses all aspects of the dialogue between the sciences and the world's religions reaching into the humanities as well as into the physical sciences and technology Examines controversial issues such as human cloning and stem cell research long with more traditional questions

such as the origins of life the nature of sin and the philosophy of science and religion 4 volumes **The Origin of Consciousness in the Social World** Charles Whitehead,2008 Western individualism has delayed scientific recognition of the essentially social nature of consciousness or at least of the human mind and brain This book demonstrates that the origin of consciousness needs to be understood in a social context *World Art Studies* Kitty Zijlmans, Wilfried Van Damme,2008 This timely volume challenges the narrow Western centrism of most art historical models Archeologists have found that for tens of thousands of years all human cultures have shared a desire for visual representation or expression Yet the study of art history has traditionally focused on Western artworks of the past few centuries *World Art Studies* examines the phenomenon of art through a broader cultural global and temporal perspective bringing together a uniquely exhaustive range of perspectives on art and borrowing approaches from the study of neuroscience evolutionary biology anthropology and geography as models alongside more conventional art historical perspectives In musicology or linguistics using such diverse viewpoints for reflection and research is considered part of the normal process In that spirit this volume goes beyond abstract models using case studies to demonstrate and examine specific methods of investigation BOOK JACKET

**Paléorient** ,2004 *The Nature of Culture* Miriam N. Haidle,Nicholas J. Conard,Michael Bolus,2016-01-19 This volume introduces a model of the expansion of cultural capacity as a systemic approach with biological historical and individual dimensions It is contrasted with existing approaches from primatology and behavioural ecology influential factors like differences in life history and demography are discussed and the different stages of the development of cultural capacity in human evolution are traced in the archaeological record The volume provides a synthetic view on a the different factors and mechanisms of cultural development and b expansions of cultural capacities in human evolution beyond the capacities observed in animal culture so far It is an important topic because only a volume of contributions from different disciplines can yield the necessary breadth to discuss the complex subject The model introduced and discussed originates in the naturalist context and tries to open the discussion to some culturalist aspects thus the publication in a series with archaeological and biological emphasis is apt As a new development the synthetic model of expansion of cultural capacity is introduced and discussed in a broad perspective **Social Brain, Distributed Mind** Robin Dunbar,Clive Gamble,John Gowlett,2010-04-29 The series includes thematic volumes that stem from symposia specially convened to address particular subjects Book Jacket **Rethinking the Human Revolution** Paul Mellars,2007 Arising from a conference *Rethinking the Human Revolution* reconsiders all of the central issues in modern human behavioural cognitive biological and demographic origins in the light of new information and new theoretical perspectives which have emerged over the past twenty years of intensive research in this field The 34 papers cover topics ranging from the DNA and skeletal evidence for modern human origins in Africa through the archaeological evidence for the emergence of distinctively modern patterns of human behaviour and cognition to the various lines of evidence for the geographical dispersal patterns of biologically and behaviourally

modern populations from their African origins throughout Asia Australasia and Europe over the past 60 000 years

**Exploring the Mind of Ancient Man** Pedarapu Chenna Reddy, 2007 This book offers a major collection of invited papers assembled for the specific occasion of the 60th birthday of Australian researcher Robert G Bednarik Its widely ranging topics reflect the equally wide ranging interests of this most productive scholar but they are all somehow arranged around his primary focus the mind of ancient man how he came to be human and what kinds of scientific methodology might be brought to bear on the ambitious task of exploring these subjects A large number of Indian and international scholars representing most continents address the broad spectrum of Bednarik's interests and acquaint the reader with many of the specific problems and issues surrounding questions of the origins of culture of human realities and the evolution of human cognition One of the most distinctive common threads in this volume is its preoccupation with prehistoric rock art reflected in the majority of the contributions which also reflect the emphasis of Bednarik's continuing life work **Anthropos**, 2001
