Bioactive Compounds in Plants Aksel Bernhoft,2010 **Curative and Preventive Properties of Medicinal Plants**

Megh R. Goyal,Junaid Ahmad Malik,Ademola Olabode Ayeleso,2023-08-04 This book provides scientific reports on the therapeutic potential of medicinal plants using animal models and provides information on the beneficial role of medicinal plants on human diseases It looks at a number of medicinal plants and examines the medicinal properties and activities of the plants for a variety of health issues such as for diabetes cardiovascular disease neurodegenerative disease organ dysfunctions cancer labor and postpartum issues and more The therapeutic mechanisms of some phytoconstituents are also discussed

Plant-Based Functional Foods and Phytochemicals Megh R. Goyal,Arijit Nath,Hafiz Ansar Rasul Suleria,2021-03-29 Plant Based Functional Foods and Phytochemicals From Traditional Knowledge to Present Innovation covers the importance of the therapeutic health benefits of phytochemicals derived from plants It discusses the isolation of potential bioactive molecules from plant sources along with their value to human health It focuses on physical characteristics uniqueness uses distribution traditional and nutritional importance bioactivities and future trends of different plant based foods and food products Functional foods beyond providing basic nutrition may offer a potentially positive effect on health and cures for various disease conditions such as metabolic disorders including diabetes cancer and chronic inflammatory reactions The volume looks at these natural products and their bioactive compounds that are increasingly utilized in preventive and therapeutic medications and in the production of pharmaceutical supplements and as food additives to increase functionality It also describes the concept of extraction of bioactive molecules from plant sources both conventional and modern extraction techniques available sources biochemistry structural composition and potential biological activities

Medicinal and Aromatic Plants Tariq Aftab,Khalid Rehman Hakeem,2021-03-27 Before the concept of history began humans undoubtedly acquired life benefits by discovering medicinal and aromatic plants MAPs that were food and medicine Today a variety of available herbs and spices are used and enjoyed throughout the world and continue to promote good health The international market is also quite welcoming for MAPs and essential oils The increasing environment and nature conscious buyers encourage producers to produce high quality essential oils These consumer choices lead to growing preference for organic and herbal based products in the world market As the benefits of medicinal and aromatic plants are recognized these plants will have a special role for humans in the future Until last century the production of botanicals relies to a large degree on wild collection However the increasing commercial collection largely unmonitored trade and habitat loss lead to an incomparably growing pressure on plant populations in the wild Therefore medicinal and aromatic plants are of high priority for conservation Given the above we bring forth a comprehensive volume Medicinal and Aromatic Plants Healthcare and Industrial Applications highlighting the various healthcare industrial and pharmaceutical applications that are being used on these immensely important MAPs and its future prospects This collection of chapters from the different

areas dealing with MAPs caters to the need of all those who are working or have interest in the above topic Analyzing Biomolecular Interactions by Mass Spectrometry Jeroen Kool, Wilfried M. A. Niessen, 2015-02-09 This monograph reviews all relevant technologies based on mass spectrometry that are used to study or screen biological interactions in general Arranged in three parts the text begins by reviewing techniques nowadays almost considered classical such as affinity chromatography and ultrafiltration as well as the latest techniques The second part focusses on all MS based methods for the study of interactions of proteins with all classes of biomolecules Besides pull down based approaches this section also emphasizes the use of ion mobility MS capture compound approaches chemical proteomics and interactomics The third and final part discusses other important technologies frequently employed in interaction studies such as biosensors and microarrays For pharmaceutical analytical protein environmental and biochemists as well as those working in pharmaceutical and analytical laboratories

Biomass, Biofuels, Biochemicals Sunita Varjani, Ashok Pandey, Thallada Bhaskar, S. Venkata Mohan, Daniel C.W. Tsang, 2021-12-04 Biomass Biofuels Biochemicals Circular Bioeconomy Technologies for Biofuels and Biochemicals provides comprehensive information on strategies and approaches that facilitate the integration of technologies for the production of bio based fuels chemicals and other value added products from wastes with waste biorefinery concepts and green strategies The book also covers lifecycle assessment and techno economic analyses of integrated biorefineries within a circular bioeconomy framework As there has been continual research on new designs in production and consumerist approaches as we move towards sustainable development by scientists of various disciplines law makers environmental activists and industrialists this book provides the latest details Resources consumption and environment degradation necessitates a transition of our linear economy towards sustainable social and technical systems As fossil resources are only projected to fulfill the needs of the population for the next couple of centuries new tactics and standards must be created to ensure future success Covers recent developments and perspectives on biofuels and chemicals production Provides the latest on the integration of technologies and processes for biofuels and chemicals production Paves a way forward roadmap to achieve Sustainable Development Goals Covers recent developments in lifecycle assessment and techno economic analysis using a waste biorefinery approach

Exploring Poisonous Plants Azamal Husen, 2023-03-14 Poisonous plants are used in traditional medicine systems in various healing therapies They are a rich resource of ingredients used in herbal drug formulations that are also used in the development of synthetic drugs They are recognized for their antioxidant anti inflammation anti cancer and anti diabetic activities and for many other health benefits Exploring Poisonous Plants Medicinal Values Toxicity Responses and Therapeutic Uses provides an analysis of the most important poisonous herbs shrubs and trees detailing poisonous plants while demonstrating endorsements for their potential therapeutic values Features Presents therapeutic potentials on various poisonous herbs shrubs and trees Provides descriptions of notable toxic compounds and discusses their adverse effects when consumed by animals or people Gives practical guidance for botanical

description distribution phytochemical constituents pharmacological studies and traditional and other potential uses of selected poisonous plants This volume in the Exploring Medicinal Plants series is appropriate for scientists researchers and students working with poisonous plants as well as in areas of economic botany plant biochemistry biotechnology pharmacognosy pharmaceuticals industrial chemistry and nanomedicine *Secondary Metabolites Based Green Synthesis of Nanomaterials and Their Applications* Azamal Husen, 2023-05-02 Nanotechnology is gaining importance in every field of science and technology Green synthesis of nanomaterials involves the use of microorganisms such as bacteria fungi viruses and different lower and higher plants Green synthesis of nanomaterials from plant extracts becoming popular in comparison to synthesis using microorganisms Plant based nanomaterials synthesis is easy have no need to bring back from the culture medium and is safe Additionally plant based nanomaterials are eco friendly in comparison to physical and chemical modes of synthesis Several lower and higher plants are rich in terms of secondary metabolites These metabolites have been used as medicine in crude extract form or with some other formulations They have been also used to isolate the bioactive compounds in modern medicine as well as in herbal medicine systems Thus phytochemicals present in the plant and their parts play an important role in nanomaterials synthesis mainly due to the presence of a significant number of secondary metabolites for instance alkaloids flavonoids saponins steroids tannins etc Further essential and aromatic oils have been also explored for nanomaterials synthesis and they are also equally useful in terms of their various biological applications These organic ingredients come from a wide range of plant components such as leaves stems roots shoots flowers bark and seeds Globally the presence of different plants has shown a capability to produce huge and diverse groups of secondary metabolites The functional groups present in the plant extract acts as capping and stabilizing agent Most of the time pure isolated bioactive compounds are more biologically active hence scholars are focusing their research on the synthesis of nanomaterials using some particular class of secondary metabolites Investigations have shown that the green synthesized nanomaterials were found to be more biologically active in comparison to chemically synthesized nanomaterials These nanomaterials and or nanocomposites found different applications especially in drug delivery detection and cure of cancer cells diagnosis of a genetic disorder photoimaging and angiogenesis detection They have also shown several applications in agricultural horticultural as well as forestry sectors The book in hand covers a wide range of topics as mentioned above It incorporates chapters that the authors have skilfully crafted with clarity and precision reviewing up to date literature with lucid illustrations The book would cater to the need of graduate students as a textbook and simultaneously be useful for both novices and experienced scientists and or researchers working in the discipline of nanotechnology nanomedicine medicinal plants plant science economic botany chemistry biotechnology pharmacognosy pharmaceuticals industrial chemistry and many other interdisciplinary subjects It should also inspire industrialists and policy makers associated with plant based nano products **Intellectual Property Rights, Naturally Derived Bioactive Compounds and Resource Conservation C.**

Gyllenhaal, N.R. Farnsworth, American Society of Pharmacognosy. Interim Meeting, 1997-06-18 The tropical rain forests have become an important focus in the search for new drugs from natural sources especially from plants This volume aims to promote a better understanding between scientists and institutions located in the developed and developing countries in their efforts to search for new medicinal agents from the plants of these forests The papers have been contributed by scientists and researchers from both developed and developing countries worldwide and cover issues relevant to biodiversity prospecting activities Such issues include rules and regulations on the collection of genetic materials for biological testing logistical and technical challenges to be faced sharing the benefits of discovery patent protection for the discovery of potentially useful drug candidates intellectual property rights and indigenous property rights The volume will be invaluable in achieving more fruitful collaborative efforts between scientists from different countries and different institutional affiliations in their search for new drugs from tropical forest plants
