Cyber Security in Parallel and Distributed Computing Dac-Nhuong Le, Raghvendra Kumar, Brojo Kishore Mishra, Jyotir Moy Chatterjee, Manju Khari, 2019-03-21 The book contains several new concepts techniques applications and case studies for cyber securities in parallel and distributed computing The main objective of this book is to explore the concept of cybersecurity in parallel and distributed computing along with recent research developments in the field Also included are various real time offline applications and case studies in the fields of engineering and computer science and the modern tools and technologies used Information concerning various topics relating to cybersecurity technologies is organized within the sixteen chapters of this book Some of the important topics covered include Research and solutions for the problem of hidden image detection Security aspects of data mining and possible solution techniques A comparative analysis of various methods used in e commerce security and how to perform secure payment transactions in an efficient manner Blockchain technology and how it is crucial to the security industry Security for the Internet of Things Security issues and challenges in distributed computing security such as heterogeneous computing cloud computing fog computing etc Demonstrates the administration task issue in unified cloud situations as a multi target enhancement issue in light of security Explores the concepts of cybercrime and cybersecurity and presents the statistical impact it is having on organizations Security policies and mechanisms various categories of attacks e g denial of service global security architecture along with distribution of security mechanisms Security issues in the healthcare sector with existing solutions and emerging threats

Grid, Cloud, and Cluster Computing; Quantum Technologies; and Modeling, Simulation and Visualization Methods Hamid R. Arabnia, Masami Takata, Leonidas Deligiannidis, Pablo Rivas, Masahito Ohue, Nobuaki Yasuo, 2025-03-28 This book constitutes the proceedings of the 20th International Conference on Grid Cloud and Cluster Computing GCC 2024 the Third International Conference on Quantum Technologies ICEQT 2024 and the 21st International Conference on Modeling Simulation and Visualization Methods MSV 2024 held as part of the 2024 World Congress in Computer Science Computer Engineering and Applied Computing in Las Vegas USA during July 22 to July 25 2024 The proceedings include 15 papers from GCC and ICEQT 2024 which have been selected from a total of 63 submissions For MSB 2024 the 5 papers included have been accepted from 26 submissions They have been organized in topical sections as follows Grid cloud and cluster computing emergent quantum technologies and modeling simulation and visualization methods

Intelligent Data Engineering and Analytics Vikrant Bhateja, Preeti Patel, Milan Simic, 2025-03-25 The book presents the proceedings of the 12th International Conference on Frontiers of Intelligent Computing Theory and Applications FICTA 2024 held at Intelligent Systems Research Group ISRG London Metropolitan University London United Kingdom during June 6 7 2024 Researchers scientists engineers and practitioners exchange new ideas and experiences in the domain of intelligent computing theories with prospective applications in various engineering disciplines in the book This book is divided into four volumes It covers broad areas of

information and decision sciences with papers exploring both the theoretical and practical aspects of data intensive computing data mining evolutionary computation knowledge management and networks sensor networks signal processing wireless networks protocols and architectures This book is a valuable resource for postgraduate students in various engineering disciplines Artificial Intelligence and Machine Learning for EDGE Computing Rajiv Pandey, Sunil Kumar Khatri, Neeraj Kumar Singh, Parul Verma, 2022-04-26 Artificial Intelligence and Machine Learning for Predictive and Analytical Rendering in Edge Computing focuses on the role of AI and machine learning as it impacts and works alongside Edge Computing Sections cover the growing number of devices and applications in diversified domains of industry including gaming speech recognition medical diagnostics robotics and computer vision and how they are being driven by Big Data Artificial Intelligence Machine Learning and distributed computing may it be Cloud Computing or the evolving Fog and Edge Computing paradigms Challenges covered include remote storage and computing bandwidth overload due to transportation of data from End nodes to Cloud leading in latency issues security issues in transporting sensitive medical and financial information across larger gaps in points of data generation and computing as well as design features of Edge nodes to store and run AI ML algorithms for effective rendering Provides a reference handbook on the evolution of distributed systems including Cloud Fog and Edge Computing Integrates the various Artificial Intelligence and Machine Learning techniques for effective predictions at Edge rather than Cloud or remote Data Centers Provides insight into the features and constraints in Edge Computing and storage including hardware constraints and the technological architectural developments that shall overcome those constraints **Computer and Information Security Handbook** John R. Vacca, 2017-05-10 Computer and Information Security Handbook Third Edition provides the most current and complete reference on computer security available in one volume The book offers deep coverage of an extremely wide range of issues in computer and cybersecurity theory applications and best practices offering the latest insights into established and emerging technologies and advancements With new parts devoted to such current topics as Cloud Security Cyber Physical Security and Critical Infrastructure Security the book now has 100 chapters written by leading experts in their fields as well as 12 updated appendices and an expanded glossary It continues its successful format of offering problem solving techniques that use real life case studies checklists hands on exercises question and answers and summaries Chapters new to this edition include such timely topics as Cyber Warfare Endpoint Security Ethical Hacking Internet of Things Security Nanoscale Networking and Communications Security Social Engineering System Forensics Wireless Sensor Network Security Verifying User and Host Identity Detecting System Intrusions Insider Threats Security Certification and Standards Implementation Metadata Forensics Hard Drive Imaging Context Aware Multi Factor Authentication Cloud Security Protecting Virtual Infrastructure Penetration Testing and much more Online chapters can also be found on the book companion website <https://www.elsevier.com/books-and-journals/book-companion/9780128038437> Written by leaders in the field Comprehensive and up to date

coverage of the latest security technologies issues and best practices Presents methods for analysis along with problem solving techniques for implementing practical solutions

Complete Word Index of Annotations in American Law Reports, 1937 *Internet of Things and Machine Learning for Type I and Type II Diabetes* Sujata Dash,Subhendu Kumar Pani,Willy Susilo,Cheung Man Yung Bernard,Gary Tse,2024-07-07 *Internet of Things and Machine Learning for Type I and Type II Diabetes Use Cases* provides a medium of exchange of expertise and addresses the concerns needs and problems associated with Type I and Type II diabetes Expert contributions come from researchers across biomedical data mining and deep learning This is an essential resource for both the AI and Biomedical research community crossing various sectors for broad coverage of the concepts themes and instrumentalities of this important and evolving area Coverage includes IoT AI Deep Learning Machine Learning and Big Data Analytics for diabetes and health informatics Integrates many Machine learning techniques in biomedical domain to detect various types of diabetes to utilizing large volumes of available diabetes related data for extracting knowledge It integrates data mining and IoT techniques to monitor diabetes patients using their medical records HER and administrative data Includes clinical applications to highlight contemporary use of these machine learning algorithms and artificial intelligence driven models beyond research settings

A Comprehensive Physically Based Approach to Modeling in Bioengineering and Life Sciences Riccardo Sacco,Giovanna Guidoboni,Aurelio Giancarlo Mauri,2019-07-18 *A Comprehensive Physically Based Approach to Modeling in Bioengineering and Life Sciences* provides a systematic methodology to the formulation of problems in biomedical engineering and the life sciences through the adoption of mathematical models based on physical principles such as the conservation of mass electric charge momentum and energy It then teaches how to translate the mathematical formulation into a numerical algorithm that is implementable on a computer The book employs computational models as synthesized tools for the investigation quantification verification and comparison of different conjectures or scenarios of the behavior of a given compartment of the human body under physiological and pathological conditions Presents theoretical modeling biological experimental and computational simulation perspectives Features examples exercises and MATLAB codes for further reader involvement Covers basic and advanced functional and computational techniques throughout the book

Ploidy and Hybridization for Crop Improvement Annaliese S. Mason,2017-11-22 Many of our current agricultural crops are natural or agricultural hybrids between two or more species or polyploids containing more than one genome or set of chromosomes These include potato oats cotton oilseed rape wheat strawberries kiwifruit banana seedless watermelon triticale and many others Polyploidy and hybridization can also be used for crop improvement for example to introgress disease resistance from wild species into crops to produce seedless fruits for human consumption or even to create entirely new crop types Some crop genera have hundreds of years of interspecific hybridization and ploidy manipulation behind them while in other genera use of these evolutionary processes for crop improvement is still at the theoretical stage This book brings together stories

and examples by expert researchers and breeders working in diverse crop genera and details how polyploidy and hybridization processes have shaped our current crops how these processes have been utilized for crop improvement in the past and how polyploidy and interspecific hybridization can be used for crop improvement in the future

Good Practice in Archaeological Diagnostics Cristina Corsi,Božidar Slapšak, Frank Vermeulen,2013-12-11 This volume represents the most important deliverable of the European funded project Radio Past www.radiopast.eu It is intended to disseminate the key results achieved in the form of methodological guidelines for the application of non destructive approaches in order to understand visualize and manage complex archaeological sites in particular large multi period settlements whose remains are still mostly buried The authors were selected from among the project research staff but also from among leading international specialists who served as speakers at the two international events organized in the framework of the project the Valle Giulia Colloquium of Rome 2009 and the Colloquium of Ghent 2013 and at the three Specialization Fora the high formation training activities organized in 2010 2011 and 2012 As such the book offers contributions on diverse aspects of the research process data capture data management data elaboration data visualization and site management presenting the state of the art and drafting guidelines for good practice in each field
