Historiography of Persian Architecture Mohammad Gharipour,2015-08-27 Historiography is the study of the methodology
of writing history the development of the discipline of history and the changing interpretations of historical events in the
works of individual historians Exploring the historiography of Persian art and architecture requires a closer look at a diverse
range of sources including chronicles historical accounts travelogues and material evidence coming from archaeological
excavations The Historiography of Persian Architecture highlights the political cultural and intellectual contexts that lie
behind the written history of Persian architecture in the twentieth century presenting a series of investigations on issues
related to historiography This book addresses the challenges complexities and contradictions regarding historical and
geographical diversity of Persian architecture including issues lacking in the 20th century historiography of Iran and
neighbouring countries This book not only illustrates different trends in Persian architecture but also clarifies changing
notions of research in this field Aiming to introduce new tools of analysis the book offers fresh insights into the discipline
supported by historical documents archaeological data treatises and visual materials It brings together well established and
emerging scholars from a broad range of academic spheres in order to question and challenge pre existing historiographical
frameworks particularly through specific case studies Overall it provides a valuable contribution to the study of Persian
architecture simultaneously revisiting past literature and advancing new approaches This book would be of interest to
students and scholars of Middle East and Iranian Studies as well as Architectural History including Islamic architecture and
historiography **Tessellations with Stars and Rosettes** Toni Sellarès,2025-04-07 The main objective of the book is to
teach how to practically construct periodic tessellations with stars and rosettes using an Interactive Geometry Software IGS
Stars and rosettes are among the most characteristic geometric ornamental motifs of Islamic art They are found on walls
ceilings doors and windows in both religious and secular buildings Tessellations are repetitive patterns of shapes that fit
together without gaps or overlaps and they are periodic when they can be constructed by translations of a shape in two
different directions Periodic tessellations with stars and rosettes are complex and symmetrical compositions with rhythmic
repetitions of profound beauty An IGS allows to create and manipulate geometric constructions producing accurate drawings
The book only assumes knowledge of basic geometric concepts and is self contained while also providing all the necessary
background information Tessellations with Stars and Rosettes is aimed at students and graduates of mathematics design

architecture artists and art historians as well as anyone who wants to draw tessellations of stars and rosettes using IGS It is suitable for a trimester or a semester course and can also be used for self study **Symmetry** István Hargittai,2014-05-23 International Series in Modern Applied Mathematics and Computer Science Volume 10 Symmetry Unifying Human Understanding provides a tremendous scope of symmetry covering subjects from fractals through court dances to crystallography and literature This book discusses the limits of perfection symmetry as an aesthetic factor extension of the Neumann Minnigerode Curie principle and symmetry of point imperfections in solids The symmetry rules for chemical reactions matching and symmetry of graphs mosaic patterns of H J Woods and bilateral symmetry in insects are also elaborated This text likewise covers the crystallographic patterns Milton s mathematical symbol of theodicy symmetries of soap films and gapon formalism This volume is a good source for researchers and specialists concerned with symmetry
