Environmental Monitoring for Cleanrooms and Controlled Environments Anne Marie Dixon,2016-04-19 A critical technology in the science of contamination control environmental monitoring is a technique that provides important data on the quality of a process processing environment and final product which can aid scientists in identifying and eliminating potential sources of contamination in cleanrooms and controlled environments In response *Good Quality Practice (GQP) in Pharmaceutical Manufacturing: A Handbook* Jordi Botet,2015-09-28 Pharmaceutical manufacturing can be viewed as a supply chain which spans from the production and purchase of the starting and packaging materials through the manufacture of dosage forms until the safe reception of the finished product by the patient The entire chain comprises of several processes auditing materials purchase procurement production storage distribution quality control and quality assurance The quality standard for pharmaceutical production is current good manufacturing practice CGMP which is applied within the frame of a pharmaceutical quality system PQS This implementation however requires a scientific approach and has to take into account several elements such as risk assessment life cycle patient protection among other factors Hence pharmaceutical manufacturing is a complex subject in terms of regulation given the technical and managerial requirements This comprehensive handbook describes CGMP for new professionals who want to understand and apply the elements which build up pharmaceutical quality assurance The book gives details about basic quality control requirements such as risk management quality hazards and management systems documentation clean environments personnel training and gives guidelines on regulatory aspects This is an ideal handbook for undergraduates studying pharmaceutical or industrial manufacturing and supply chains as well for entrepreneurs and quality control professionals seeking to learn about CGMP standards and implementing quality assurance systems in the pharmaceutical sector

Healthcare Sterilisation
Wayne J Rogers,2014-06-09 The collection of topics in the second volume of this book challenges the reader to think beyond standard methods and question why certain current procedures remain static while technological advances abound in other aspects of sterilisation technology By small means better practices may come to pass to help answer some of the residual healthcare sterilisation and nosocomial infection queries What are some of the current challenges in healthcare sterilisation and how can they be handled What are some of the acceptable current non traditional sterilisation methods challenging alternatives and novel modalities What are some of the packaging validation and statistical considerations of sterilisation practices How does design of product and packaging interrelate with sterilisation processing Are the current sterility media and practices optimal for recovery of more modified and more resistant viable organism entities and product Are there increased sterility and product quality needs with new types of implantables and technological advances within the three dimensional combinations of diagnostics drug release and challenging medical devices

No Life Without Needles
MuthuKumar Subramanian,2025-09-09 A compelling journey through the world of sterile injections this book shares the
