

Metaphysics

- Metaphysics is the study of that which exist, reality, and the nature of things.
- Before you study anything you must know what it “is”, that it exists, that it is real, and it’s nature.
- If it does not exist, it is not real, it has no nature of existence, and it “isn’t.” However, there may be beliefs based on a non-existent that people study.

The Metaphysics of Self and World Elie Maynard Adams, 1991 A great fissure occurred in Western civilization in the early modern period with the divorce between the humanities and the sciences and the rise of scientific naturalism The *Metaphysics of Self and World* is a philosophical exploration of the relationship between the individual the culture and the world It is in the author's words a philosophy of the humanities a philosophy of humanity and a philosophy of social reality It explores the implications of a world view that would integrate the perspective of the sciences with humanistic ways of thought E M Adams claims that we do violence to ourselves as human beings by trying to fit into the world as delineated in scientific categories Rejecting cultural subjectivism and scientific naturalism he argues for the irreducibility and validity of the categories of the humanities and for a fully developed humanistic philosophy of self and world In generating this world view he utilizes the humanities as a source of culture therapy in order to close the fissure in Western civilization Author note E M Adams is Kenan Professor of Philosophy Emeritus at the University of North Carolina Chapel Hill He has written numerous books and articles and a festschrift celebrating his work *Mind Value and Culture Essays in Honor of E M Adams* edited by David Weissbord was published in 1989 *Coming to Be* James W. Furlong, 2007-03-19 In an age where appearances are often substituted for what really is deception and falsity for honesty and truth this metaphysics book takes things as they actually are and discovers that reality is actuality which as subsistent is God that philosophical knowledge in its content is caused by what is known and is objectively true It considers goodness and beauty human existents as individual relational units e.g. the family agents and goals chance and evil It is in contrast with Sartrean existentialism process philosophy linguistic analysis phenomenology hermeneutics and deconstructionism
