### COURSE BENEFITS

Certified Penetration Testing Engineer graduates will obtain real world security knowledge enabling them to recognize vulnerabilities, exploit system weaknesses, and safeguard organizations against threats. Graduates will learn the art of Ethical Hacking with a professional edge (Penetration Testing).

### COURSE OVERVIEW

CPTEngineer's foundation is built firmly upon proven, hands-on, Penetration Testing methodologies utilized by our international group of vulnerability consultants. Mile2 trainers keep abreast of their field by practicing what they teach. They believe that, during training, an equal emphasis should be placed on both theoretical and real world experience if the student is going to succeed in mastering the necessary skills to become a CPTEngineer..

The CPTEngineer presents information based on the 5 Key Elements of Pen Testing: Information Gathering, Scanning, Enumeration, Exploitation and Reporting. System vulnerabilities will be discovered using these tried and true steps alongside the use of the latest hacking techniques.

This course also enhances the business skills needed by today's students. It will enable them to identify protection opportunities, justify testing activities, and optimize security controls needed by businesses attempting to reduce risks.

mile2 goes far beyond simply teaching students to "Hack". Mere hacking was the norm for classes that were available before mile2's introduced a new methodology in teaching this advanced skill.

Also available as:

### LIVE VIRTUAL TRAINING

Attend live classes from anywhere in the world!

- Our Live Online classes make use of industry standard meeting and collaboration technologies. Students use simple web based tools to view slides, the instructors desktop, and videos all while holding live audio (and chat) discussions with the instructor.
- During lab time, each remote student has a dedicated high spec remote PC. Students have full desktop access as if they were sitting in-front a PC in the actual computer lab.
- The instructor monitors each student's PC as they perform the labs remotely. The instructor can access the remote student's system to demonstrate and assist in the event questions arise.
- Public and private text chat allows for increased interactivity between students and instructor during class in a way that prevents interruptions to other students.
