Ni Usrp And Labview:

Power Engineering and Intelligent Systems Vivek Shrivastava, Jagdish Chand Bansal, Bijaya Ketan Panigrahi, 2026-02-12 This book presents a collection of the high quality research articles in the field of power engineering grid integration energy management soft computing artificial intelligence signal and image processing data science techniques and their real world applications This book is presented at International Conference on Power Engineering and Intelligent Systems PEIS 2025 held during March 8 9 2025 at National Institute of Technology Srinagar Uttarakhand India This book is presented in two volumes

Inventive Computation Technologies S. Smys, Robert Bestak, Álvaro Rocha, 2019-11-02 With the intriguing development of technologies in several industries along with the advent of ubiquitous computational resources there are now ample opportunities to develop innovative computational technologies in order to solve a wide range of issues concerning uncertainty imprecision and vagueness in various real life problems The challenge of blending modern computational techniques with traditional computing methods has inspired researchers and academics alike to focus on developing innovative computational techniques In the near future computational techniques may provide vital solutions by effectively using evolving technologies such as computer vision natural language processing deep learning machine learning scientific computing and computational vision A vast number of intelligent computational algorithms are emerging along with increasing computational power which has significantly expanded the potential for developing intelligent applications These proceedings of the International Conference on Inventive Computation Technologies ICICT 2019 cover innovative computing applications in the areas of data mining big data processing information management and security

Simulation Tools and Techniques Houbing Song, Dingde Jiang, 2021-04-26 This two volume set constitutes the refereed post conference proceedings of the 12th International Conference on Simulation Tools and Techniques SIMUTools 2020 held in Guiyang China in August 2020 Due to COVID 19 pandemic the conference was held virtually The 125 revised full papers were carefully selected from 354 submissions The papers focus on simulation methods simulation techniques simulation software simulation performance modeling formalisms simulation verification and widely used frameworks

Spectrum Access and Management for Cognitive Radio Networks Mohammad A Matin, 2016-09-16 This book presents cutting edge research contributions that address various aspects of network design optimization implementation and application of cognitive radio technologies It demonstrates how to make better utilization of the available spectrum cognitive radios and spectrum access to achieve effective spectrum sharing between licensed and unlicensed users The book provides academics and researchers essential information on current developments and future trends in cognitive radios for possible integration with the upcoming 5G networks In addition it includes a brief introduction to cognitive radio networks for newcomers to the field

Chaotic Signals in Digital Communications Marcio Eisencraft, Romis Attux, Ricardo Suyama, 2013-10-25 Chaotic Signals in Digital Communications combines fundamental background knowledge with state of the art methods for using chaotic signals

and systems in digital communications The book builds a bridge between theoretical works and practical implementation to help researchers attain consistent performance in realistic environments It shows the possible shortcomings of the chaos based communication systems proposed in the literature particularly when they are subjected to non ideal conditions It also presents a toolbox of techniques for researchers working to actually implement such systems A Combination of Tutorials and In Depth Cutting Edge Research Featuring contributions by active leading researchers the book begins with an introduction to communication theory dynamical systems and chaotic communications suitable for those new to the field This lays a solid foundation for the more applied chapters that follow A Toolbox of Techniques Including New Ways to Tackle Channel Imperfections The book covers typical chaos communication methods namely chaotic masking chaotic modulation chaotic shift key and symbolic message bearing as well as bidirectional communication and secure communication It also presents novel methodologies to deal with communication channel imperfections These tackle band limited channel chaos communication radio channels with fading and the resistance of a special chaotic signal to multipath propagations In addition the book addresses topics related to engineering applications such as optical communications chaotic matched filters and circuit implementations and microwave frequency modulated differential chaos shift keying FM DCSK systems Insights for Both Theoretical and Experimental Researchers Combining theory and practice this book offers a unique perspective on chaotic communication in the context of non ideal conditions Written for theoretical and experimental researchers it tackles the practical issues faced in implementing chaos based signals and systems in digital communications applications

Advances in Wireless Communications and Applications Roumen Kountchev, Aniket Mahanti, Shen Chong, Srikanta Patnaik, Margarita Favorskaya, 2020-09-03 This book features selected papers presented at the 3rd International Conference on Wireless Communications and Applications ICWCA 2019 held at Hainan University China Focusing on applications of the latest smart theories and approaches and recent advances in the field it covers topics such as OFDM and multi carrier techniques smart antenna and space time signal processing MIMO multi user MIMO and massive MIMO modulation coding and diversity techniques dynamic spectrum access and cognitive radio interference management and radio resource allocation equalization techniques synchronization estimation and detection techniques and wireless multiple access e g CDMA OFDMA NOMA

Programming with LabVIEW 2012 Gaurav Soni, 2017-03-30 LabVIEW is a software for real time as well as software based simulation of any real time application like testing of Wi Fi signals analysis of WiMAX WCDMA LTE using hardware such as USRP Universal Software Radio Peripheral VST Vector Signal Transceivers etc It is a program development application that uses graphical programming language G to create programs in block diagram form Execution is determined by the structure of a graphical block diagram on which the programmer connects different function nodes by drawing wires This book is based upon LABVIEW and dedicated hardware like USRP and VST The course contents are as follows Fundamentals of LABVIEW Examples Debugging Methods and techniques Run Tools Probe for values highlight

execution Changing displaying values via front panel etc control indicators Create a VI Connector Adding Removing input output modes Loops arrays case structure in LabVIEW LABVIEW based projects Demonstration of the simplest form of data acquisition Building Communication System using USRP USRP based project implementation on wireless communication Organization of data acquisition VIs that lists the various types of VIs Design and implementation of 3G and 4G technologies like WCDMA LTE WiMAX using Vector Signal transceiver VST *FPGA-Based Software-Defined Radio and Its Real-Time Implementation Using NI-USRP* Nikhil Marriwala,2017 In this chapter we propose a novel design of scalable and real time data acquisition software architecture for software defined radio SDR using universal software radio peripheral USRP The software has been designed and tested in multi thread model using LabVIEW which guarantees real time performance and efficiency With the help of this design we have been able to improve the stability of the system besides providing a reconfigurable and flexible architecture Wireless transfer of sensitive data using communication is not a very safe option In this chapter we aim to provide a safe and private wireless transmission between two terminals using the SDR approach and verifying the results in real world environment with the use of USRP The novel design being presented here can be used to transfer random data text or an image encoded with different forward error correction FEC codes which is then verified at the receiving terminal and then decoded accordingly to produce the desired result *LabVIEW for Data Acquisition* Bruce Mihura,2001-06-26 The practical succinct LabVIEW data acquisition tutorial for every professional No matter how much LabVIEW experience you have this compact tutorial gives you core skills for producing virtually any data acquisition DAQ application input and output Designed for every engineer and scientist LabVIEW for Data Acquisition begins with quick start primers on both LabVIEW and DAQ and builds your skills with extensive code examples and visual explanations drawn from Bruce Mihura's extensive experience teaching LabVIEW to professionals Includes extensive coverage of DAQ specific programming techniques Real world techniques for maximizing accuracy and efficiency The 10 most common LabVIEW DAQ development problems with specific solutions Addresses simulation debugging real time issues and network distributed systems Preventing unauthorized changes to your LabVIEW code An overview of transducers for a wide variety of signals Non NI alternatives for hardware and software LabVIEW for Data Acquisition includes an extensive collection of real world LabVIEW applications lists of LabVIEW tips and tricks coverage of non NI software and hardware alternatives and much more Whatever data acquisition application you need to create this is the book to start and finish with RELATED WEBSITE The accompanying website includes an evaluation version of LabVIEW and key LabVIEW code covered in the book
