**Semiconductor Nanotechnology** Stephen M. Goodnick, Anatoli Korokin, Robert Nemanich, 2018-07-26. This book presents research dedicated to solving scientific and technological problems in many areas of electronics, photonics, and renewable energy. Energy and information are interconnected and are essential elements for the development of human society. Transmission, processing, and storage of information requires energy consumption, while the efficient use and access to new energy sources requires new information, ideas, and expertise, and the design of novel systems such as photovoltaic devices, fuel cells, and batteries. Semiconductor physics creates the knowledge base for the development of information computers, cell phones, etc., and energy photovoltaic technologies. The exchange of ideas and expertise between these two technologies is critical and expands beyond semiconductors. Continued progress in information and renewable energy technologies requires miniaturization of devices and reduction of costs, energy, and material consumption. The latest generation of electronic devices is now approaching nanometer-scale dimensions; new materials are being introduced into electronics manufacturing at an unprecedented rate, and alternative technologies to mainstream CMOS are evolving. Nanotechnology is widely accepted as a source of potential solutions in securing future progress for information and energy technologies. Semiconductor Nanotechnology features chapters that cover the following areas: atomic-scale materials design, bio and molecular electronics, high-frequency electronics, fabrication of nanodevices, magnetic materials and spintronics, materials and processes for integrated and subwave optoelectronics, nanoCMOS, new materials for FETs and other devices, nanoelectronics system architecture, nano-optics and lasers, non-silicon materials and devices, chemical and biosensors, quantum effects in devices, nano-science and technology applications in the development of novel solar energy devices and fuel cells, and batteries.
