Software Project Management: A Concise Study 2Nd Ed. S. A. Kelkar, 2009-11-23 Past experience with the development of software products indicates that there is much scope for improvement Being design intensive software projects run the risk of cost schedule overruns besides remaining off the mark in satisfying the customers The blame for the failures is very often attributed to inadequate project management rather than lack of competence in development With the growth in the size and complexity of software projects and the corresponding design and development effort involved the importance of formal software project management cannot be overemphasized This book in its second edition comprehensively presents the essentials of theory and practice of software project management methodologies The aim is to introduce the readers to the subject in a conceptual framework The topics included in this edition are updated as per the ongoing trends in the field of software project management There is an appendix on Metrics and Measurements This title includes a list of abbreviations at the beginning of chapters The book is well suited for teaching an academic course of one semester or for conducting short training programmes for software engineers and project managers Armed with updated concepts and ideas software engineers and project managers will be able to plan every aspect of a project to ensure its timely implementation within the stipulated budget and required quality standards

Role of software requirements management tools in rework & software project success Faisal Adnan, Imran Haider Naqvi, 2015-09-23 Master s Thesis from the year 2015 in the subject Computer Science Software grade 1 course MS

in Project Management language English abstract This research quantified the role of the different factors of rework including project planning PP software requirements specifications document quality SRSDQ software testing ST software requirements management SRM software requirements traceability SRT maturity of software development life cycle SDLC approach MSDLCA changing requirements CR scope creep SC with rework project success PS using automated software requirements management tools UseofSRMT The underlying associations of the above factors of rework in SDLC and UseofSRMT with rework PS were quantified through a survey conducted in the software houses The study quantified the magnitude of rework which was increased decreased by these factors of rework The study also quantified the magnitude of PS increased decreased by these factors of rework This study concluded that UseofSRMT played a moderating role between factors of rework and PS The study also quantified the mediating role of rework between the factors of rework PS The study contributed that rework was avoidable in SDLC Major causes of unsuccessful software projects were determined Most effective features of software requirements management tools SRMT were considered to determine their role as an effective methodology for PS PS could never be guaranteed by just achieving project milestones goals in terms of the triple constraints of time budget schedule Software Project Dynamics Tarek K. Abdel-Hamid, Stuart E. Madnick, 1991 M CREATED *The Software Project Manager's Handbook* Dwayne Phillips, 1998-07-11 Written for researchers professors practitioners students and other computing professionals this book covers Basics that Work at Work People Process and Product Visibility Configuration Management Process Planning Risk Management Requirements Design Testing Managing a Project Day by Day Managing Software Maintenance and more *Managing Software Developing Projects* Peter Hirschbichler, 2011-02 Master s Thesis from the year 2008 in the subject Business economics Business Management Corporate Governance grade 1 University of Salzburg Universita tslehrgang Executive Master in Management MIM language English abstract In the last decades Information Technology IT has become vital for every company And a company not using IT would be unimaginable today Primarily IT was merely used for accelerating existent processes Mostly standardised applications have been deployed to standard areas in companies for example accounting software Today IT is an important part for modelling all types of business processes not only the standardised processes Furthermore to gain competitive advantages mere standard software is not suitable anymore This is because standard software can not support the requirements of individualised processes necessary for doing business better than the competitor Therefore either standard software is customised for supporting individualised processes or a company decides developing individualised software from the scratch Often companies decide to develop individualised software on their own because of the following three reasons First the process knowledge is important for gaining competitive advantages and this confidential information must kept inside the company Second employees within the organisation have the best process knowledge Effective transfer of process knowledge to the IT department can be guaranteed Third customising standard software needs much external expertise which is in general

expensive Often software development projects have budgets of several million Euros and can cause an even higher reduction of costs Thus process and software development has become one of the most important aspects for many IT departments in today s companies However managing software developing projects is not an easy task Many software developing projects are not on time and budget An analysis of the Software Engineering Guides Jon Fairclough,1996 Contains 10 guides to software engineering produced by the European Space Agency explaining how to apply the previously published Software Engineering Standards Each guide describes the process to be followed provides information about the contents of documents required by the Standards and contains its own index references glossary and other appendices Includes guides for the user requirement definitions phase the software transfer phase and quality assurance For software engineers Annotation copyrighted by Book News Inc Portland OR
