Agarwal, 1995 World Scientific series in Applicable Analysis WSSIAA aims at reporting new developments of high  
mathematical standard and current interest Each volume in the series shall be devoted to the mathematical analysis that has  
been applied or potentially applicable to the solutions of scientific engineering and social problems For the past twenty five  
years there has been an explosion of interest in the study of nonlinear dynamical systems Mathematical techniques  
developed during this period have been applied to important nonlinear problems ranging from physics and chemistry to  
ecology and economics All these developments have made dynamical systems theory an important and attractive branch of  
mathematics to scientists in many disciplines This rich mathematical subject has been partially represented in this collection  
of 45 papers by some of the leading researchers in the area This volume contains 45 state of art articles on the mathematical  
theory of dynamical systems by leading researchers It is hoped that this collection will lead new direction in this field
