Alfred Laycock

8 2584:

Tables of Spectral Lines A. Zaidel',2013-11-11 The broad development of spectroscopy in our country and in particular the extensive industrial applications of methods of spectral analysis make the need for basic reference literature a pressing one Tables of spectral lines as basic primary material necessary for the identification of spectra are the most important of these reference books The need for such tables is acutely felt by all who work in spectroscopy and numerous requests for such a book have been received by the Commission on Spectroscopy of the Academy of Sciences of the USSR On the world book market there are fairly complete tables that cover a very great number of spectral lines and that have been compiled rather carefully although they are not free of errors Tables of this kind are undoubtedly necessary in general spectroscopic research and must be included among the reference books of large scientific institutions But the number of workers who need such complete tables is comparatively limited Therefore after long discussion it was deemed impractical to republish these tables
