This book was born from curiosity To begin with it was the curiosity of an economist who studied in the 60 s in an environment which has subsequently developed from national into global economics Who has to recognize that politicians scholars and large segments of society oblivious to supranational authorities and economic globalization forces continue to labour under the notion that they are still fully autonomous and sovereign when shaping national economic policy And pretend as though their own national state were still the master in its own house that despite unbridled market economics could continue to dictate to the economy and companies how to live and in which rooms All that has become fiction The laws of globalization diminish the manoeuvring space for shaping national economic policy Even if many folks today don't want to hear it The issue is no longer achieving what is socially politically desirable for the own society but rather the optimal adaptation of society and social benefits to the politically practicable **Perspectives on User Innovation** Stephen Flowers,Flis Henwood,2010 There has been a dramatic shift towards more open forms of innovation Drawing on practice based insights together with theoretical approaches developed in innovation studies science technology studies this book brings together a collection of recent work that examines key aspects of this model of innovation *Motor Industry Management* ,2003-02
