Mapping the Market for Sex with Trafficked Minor Girls in Minneapolis Lauren Martin, Alexandra Pierce, 2014 [The Myths of Regional Innovation](#) Rider W. Foley, 2025-08-08 Billions of dollars Euros yen and yuan in public funds are spent annually to promote innovation in metropolitan regions attempting to transform the economy by attracting technology based companies and supporting small startups to secure high paying jobs The impacts of those investments are typically assessed in terms of economic growth venture capital and jobs Regional innovation is assessed with financial measures that do not account for the distribution of wealth nor do they evaluate if innovation addresses broader sustainability concerns This book draws on evidence from 144 interviews with civic leaders in three urban regions Atlanta Phoenix and the Twin Cities to illuminate three commonly accepted but flawed myths about innovation that misdirect policymakers and civic leaders and perpetuate the idea that innovation is solely about economic growth This book offers evidence of the social networks labor divisions and conditions enabling innovation to dispel those three myths and propose more nuanced and realistic ways of thinking about regional innovation This book is not an argument against innovation Rather it critically reflects upon investments in innovation and showcases laudable efforts to create a livable and sustainable city The book offers a novel method to assess the processes and outcomes of innovation in a manner that can complement economic approaches The author lays bare the human values that motivate city staff corporate officers and academic partners and highlights the efforts of organizations that often remain underappreciated The evidence presented in this book puts forward a means to assess if and how innovation contributes to an equitable and sustainable future or if it perpetuates injustices and economic stratification *The Myths of Regional Innovation* will appeal to scholars across broad fields including
