Countering the Problem of Falsified and Substandard Drugs Institute of Medicine, Board on Global Health, Committee on Understanding the Global Public Health Implications of Substandard, Falsified, and Counterfeit Medical Products, 2013-06-20 The adulteration and fraudulent manufacture of medicines is an old problem vastly aggravated by modern manufacturing and trade In the last decade impotent antimicrobial drugs have compromised the treatment of many deadly diseases in poor countries More recently negligent production at a Massachusetts compounding pharmacy sickened hundreds of Americans While the national drugs regulatory authority hereafter the regulatory authority is responsible for the safety of a country's drug supply no single country can entirely guarantee this today The once common use of the term counterfeit to describe any drug that is not what it claims to be is at the heart of the argument In a narrow legal sense a counterfeit drug is one that infringes on a registered trademark The lay meaning is much broader including any drug made with intentional deceit Some generic drug companies and civil society groups object to calling bad medicines

counterfeit seeing it as the deliberate conflation of public health and intellectual property concerns Countering the Problem of Falsified and Substandard Drugs accepts the narrow meaning of counterfeit and because the nuances of trademark infringement must be dealt with by courts case by case the report does not discuss the problem of counterfeit medicines
