Introduction: Energy Levels and Sublevels

In addition to the energy level model, Bohr proposed the following model of energy levels. The energy level of the atom can be thought of as the distance

between adjacent energy levels. Energy levels are the sublevels of the energy level. Each energy level contains several sublevels. Draw the following table:

Table 1

Energy Level	Number of sublevels in each energy level
1	1
2	2
3	3
4	4

Now that there is a table, draw as a structural model of the 1^{st} energy level. Draw the energy level of sublevels in the 1^{st} energy level.
