*Artificial Neural Network Applications in Business and Engineering* Do, Quang Hung, 2021-01-08 In today's modernized market various disciplines continue to search for universally functional technologies that improve upon traditional processes Artificial neural networks are a set of statistical modeling tools that are capable of processing nonlinear data with strong accuracy Due to their complexity utilizing their potential was previously seen as a challenge However with the development of artificial intelligence this technology has proven to be an effective and efficient problem solving method *Artificial Neural Network Applications in Business and Engineering* is an essential reference source that illustrates recent advancements of artificial neural networks in various professional fields accompanied by specific case studies and practical examples Featuring research on topics such as training algorithms transportation and computer security this book is ideally designed for researchers students developers managers engineers academicians industrialists policymakers and educators seeking coverage on modern trends in artificial neural networks and their real world implementations *Nexus Network Journal* 14,3 Kim Williams, 2014-03-07 The Winter 2012 vol 14 no 3 issue of the *Nexus Network Journal* features seven original papers dedicated to the theme Digital Fabrication Digital fabrication is changing architecture in fundamental ways in every phase from concept to artifact Projects growing out of research in digital fabrication are dependent on software that is entirely surface oriented in its underlying mathematics Decisions made during design prototyping fabrication and assembly rely on codes scripts parameters operating systems and software creating the need for teams with multidisciplinary expertise and different skills from IT to architecture design material engineering and mathematics among others The papers grew out of a Lisbon symposium hosted by the ISCTE Instituto Universitario de Lisboa entitled Digital Fabrication A State of the Art The issue is completed with four other research papers which address different mathematical instruments applied to architecture including geometric tracing systems proportional systems descriptive geometry and correspondence analysis The issue concludes with a book review *Network World*, 2000-10-02 For more than 20 years *Network World* has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce **International Conference on Computer Science and Network Security (CSNS 2014)**, 2014-06-11 held from April 12 to 13 2014 in Xi an China The purpose of CSNS2014 is to provide a platform for researchers engineers and academicians as well as industrial professionals to present their research results and development on computer science and network security The conference welcomes all the topics around Computer Science and Network Security It provides enormous opportunities for the delegates to exchange new ideas and application experiences to establish global business or research cooperation The proceeding volume of CSNS2014 will be published by DEStech Publications All

the accepted papers have been selected according to their originality structure uniqueness and other standards of same importance by a peer review group made up by 2-3 experts. The conference program is of great profoundness and diversity composed of keynote speeches, oral presentations and poster exhibitions. It is sincerely hoped that the conference would not only be regarded as a platform to provide an overview of the general situation in related area but also a sound opportunity for academic communication and connection.

Contemporary fastidious companies are required to eliminate wastes and offer value added products and services to the customers which requirement is fulfilled by adopting the paradigm called lean manufacturing. On the other side futuristic companies surge towards reaching the twenty first century mission by reacting quickly in accordance with the dynamic demands of the modern customers for which researchers have been developing a paradigm called agile manufacturing. Although various techniques and tools are applied cohesive procedures are yet to be evolved to implement these paradigms systematically and successfully in companies. In this context this book is evolved to address students, academics, practitioners and researchers for gaining theoretical, practical and research futuristic knowledge on lean and agile manufacturing paradigms. Organised in 18 chapters the text opens with a historical overview of lean and agile manufacturing paradigms. It then discusses the lean manufacturing principles with their application procedures. The book comprehensively analyses the methods of implementation of lean manufacturing paradigm in both traditional and moderate organisations. It also gives an equal treatment to the implementation of agile manufacturing paradigm under four drivers such as management driver, technology driver, manufacturing strategy driver and competition driver through the adoption of appropriate agile manufacturing criteria. The book concludes with a discussion of lean and agile manufacturing paradigms from the perspectives of academia, researchers and practitioners. The text is well supported by a large number of self test questions.
