European Architecture, 1892 Forging Architectural Tradition Dragan Damjanović, Aleksander Łupienko, 2022-03-11 During the nineteenth century a change developed in the way architectural objects from the distant past were viewed by contemporaries Such edifices be they churches castles chapels or various other buildings were not only admired for their aesthetic values but also for the role they played in ancient times and their role as reminders of important events from the national past Architectural heritage often was and still is an important element of nation building Authors address the process of building national myths around certain architectural objects National narratives are questioned as is the position architectural heritage played in the nineteenth and the early twentieth centuries *A Modern History of European Cities* Rosemary Wakeman, 2020-01-23 Rosemary Wakeman s original survey text comprehensively explores modern European urban history from 1815 to the present day It provides a journey to cities and towns across the continent in search of the patterns of development that have shaped the urban landscape as indelibly European The focus is on the built environment the social and cultural transformations that mark the patterns of continuity and change and the transition to modern urban society Including over 60 images that serve to illuminate the analysis the book examines whether there is a European city and if so what are its characteristics Wakeman offers an interdisciplinary approach that incorporates concepts from cultural and postcolonial studies as well as urban geography and provides full coverage of urban society not only in western Europe but also in eastern and southern Europe using various cities and city types to inform the discussion The book provides detailed coverage of the often neglected urbanization post 1945 which allows us to more clearly understand the modernizing arc Europe has followed over the last two centuries *European Architecture*, 1989 *Sir John Vanbrugh* Vaughan Hart, 2008 In explaining why Vanbrugh s buildings look the way they do Hart allows his novel architectural forms to be understood for the first time as expressions of the visual and psychological theories of his friend and fellow Whig Joseph Addison BOOK JACKET *Manufacturing Middle Ages*, 2013-08-22 Across the nineteenth century European history philology archaeology art and architecture turned from a common classical vocabulary and ideology to images of pasts and origins drawn primarily from the Middle Ages The result was a paradox as scholars and artists schooled in the same pan European vocabularies and methodologies nevertheless sought to discover through them unique and frequently oppositional national identities These essays edited by Patrick J Geary and G bor Klaniczay focus on this all European phenomenon with a special focus on Scandinavia and East Central Europe bearing witness to the inextricable links between cultural and scientific engagement the search for national identity and political agendas in the long nineteenth century that made the search for archaic origins an entangled history Contributors include Walter Pohl Ian Wood Sverre Bagge Maciej Janowski Sir
