Perkins, Douglas John Emlen, 2016 Science writer Carl Zimmer and evolutionary biologist Douglas Emlen have produced a thoroughly revised new edition of their widely praised evolution textbook Emlen an award winning evolutionary biologist at the University of Montana has infused Evolution Making Sense of Life with the technical rigor and conceptual depth that today's biology majors require Zimmer an award winning New York Times columnist brings compelling storytelling to the book bringing evolutionary research to life Students will learn the fundamental concepts of evolutionary theory such as natural selection genetic drift phylogeny and coevolution The book also drives home the relevance of evolution for disciplines ranging from conservation biology to medicine With riveting stories about evolutionary biologists at work everywhere from the Arctic to tropical rainforests to hospital wards the book is a reading adventure designed to grab the imagination of students showing them exactly why it is that evolution makes such brilliant sense of life

**Loose-Leaf Version for Evolution** Douglas J. Emlen, Carl Zimmer, 2019-08 **Life's Edge** Carl Zimmer, 2021-03-09 FINALIST FOR THE PEN E O WILSON LITERARY SCIENCE WRITING AWARD A NEW YORK TIMES NOTABLE BOOK OF 2021 A SCIENCE NEWS FAVORITE BOOK OF 2021 A SMITHSONIAN TOP TEN SCIENCE BOOK OF 2021 Stories that both dazzle and edify This book is not just about life but about discovery itself Siddhartha Mukherjee New York Times Book Review We all assume we know what life is but the more scientists learn about the living world from protocells to brains from zygotes to pandemic viruses the harder they find it is to locate life's edge Carl Zimmer investigates one of the biggest questions of all What is life The answer seems obvious until you try to seriously answer it Is the apple sitting on your kitchen counter alive or is only the apple tree it came from deserving of the word If we can't answer that question here on earth how will we know when and if we discover alien life on other worlds The question hangs over some of society's most charged conflicts whether a fertilized egg is a living person for example and when we ought to declare

a person legally dead Life s Edge is an utterly fascinating investigation that no one but one of the most celebrated science writers of our generation could craft Zimmer journeys through the strange experiments that have attempted to re create life Literally hundreds of definitions of what that should look like now exist but none has yet emerged as an obvious winner Lists of what living things have in common do not add up to a theory of life It s never clear why some items on the list are essential and others not Coronaviruses have altered the course of history and yet many scientists maintain they are not alive Chemists are creating droplets that can swarm sense their environment and multiply Have they made life in the lab Whether he is handling pythons in Alabama or searching for hibernating bats in the Adirondacks Zimmer revels in astounding examples of life at its most bizarre He tries his own hand at evolving life in a test tube with unnerving results Charting the obsession with Dr Frankenstein s monster and how the world briefly believed radium was the source of all life Zimmer leads us all the way into the labs and minds of researchers engineering life from scratch

**Darwin's Secret Sex Problem** F. LaGard Smith,2018-03-01 Darwins Secret Sex Problem What Darwin Ignored For all his revolutionary insight into the fascinating processes of evolution so useful to current scientific research health care and technology Darwin never seriously confronted the crucial insurmountable gap in his grand theory between asexual replication and sexual reproduction Nor could Darwins famed natural selection have provided simultaneous on time delivery of the first male female pair of millions of sexually unique species required for evolutions bedrock premise of common descenta fundamental flaw fatal to the romanticized microbe to man Evolution Story Darwins Secret Sex Problem is a witty engaging scientifically sound exploration of perhaps the greatest secret of sexualitythe utter inability of Darwinian evolution to explain its origin John E Silvius PhD Senior Professor Emeritus of Biology Cedarville University I highly recommend this book by F LaGard Smith a nonspecialist whose careful research demonstrates that he understands the crucial issues surrounding evolutions fatal sex problem and who has a remarkable ability to communicate complex concepts to a broad audience Geoff Barnard PhD MA retired Reproductive Endocrinologist and Cambridge University Research Scientist

**Feathered Marvels** Dominic F. Sherony,Randi Minetor,2024-01-22 From the discovery of the fossil Archaeopteryx to more than 10 000 different documented species today birds have become the second most diversified class of vertebrates on Earth Birds have evolved extensively since they first emerged in prehistoric times but that diversity could dwindle and even vanish unless we take steps to conserve their habitats ensuring that they sustain their numbers and their variety This natural history of birds starts in the distant past going back to the Jurassic Cretaceous and Paleogene periods in order to get a broader understanding of the birds that we see today Chapters cover their lives breeding flight migration and more while also highlighting some especially unique bird fossils such as the Pelagornis Sandersi which had a wingspan of more than 20 feet Also included are chapters on the loss of needed habitats the current decline of native birds and what can be done to reverse it

Evolutionary History in Theological Perspective Mario Anthony Russo,2024-06-10 Evolutionary History in Theological Perspective Exploring the Scientific Story

of the Cosmos develops a new theological interpretation of evolutionary history Exploring both secular and theological interpretations of evolutionary history this new interpretation hinges on the similarities between individual redemption and the eschatological story of cosmic redemption as mediated by the Holy Spirit throughout evolutionary history This new lens is then applied to relevant questions raised by the evolutionary process especially suffering and helps overcome the current shortcomings of contemporary interpretations of evolutionary history

Spotlighting these conceptual difficulties and presenting alternate theoretical interpretations that alleviate this incompatibility Massimo Pigliucci and Jonathan Kaplan intertwine scientific and philosophical analysis to produce a coherent picture of evolutionary biology Innovative and controversial Making Sense of Evolution encourages further development of the Modern Synthesis and outlines what might be necessary for the continued refinement of this evolving field *The Westminster* ,1907
