**Ritual Communication** Bloomsbury Publishing,2015-03-06 Ritual Communication examines how people create and express meaning through verbal and non verbal ritual Ritual communication extends beyond collective religious expression It is an intrinsic part of everyday interactions ceremonies theatrical performances shamanic chants political demonstrations and rites of passage Despite being largely formulaic and

repetitive ritual communication is a highly participative and self oriented process The ritual is shaped by time space and the individual body as well as by language ideologies local aesthetics contexts of use and relations among participants Ritual Communication draws on a wide range of contemporary cultures from Africa America Asia and the Pacific to present a rich and diverse study for students and scholars of anthropology sociology and sociolinguistics

**Relationship Thinking** N. J. Enfield, 2013-11-26 In *Relationship Thinking* N J Enfield outlines a framework for analyzing social interaction and its linguistic cultural and cognitive underpinnings by focusing on human relationships This is a naturalistic approach to human sociality grounded in the systematic study of real time data from social interaction in everyday life Many of the illustrative examples and analyses in the book are a result of the author s long term field work in Laos Enfield promotes an interdisciplinary approach to studying language culture and mind building on simple but powerful semiotic principles and concentrating on three points of conceptual focus The first is human agency the combination of flexibility and accountability which defines our possibilities for social action and relationships and which makes the fission and fusion of social units possible The second is enchrony the timescale of conversation in which our social relationships are primarily enacted The third is human sociality a range of human propensities for social interaction and enduring social relations grounded in collective commitment to shared norms Enfield s approach cuts through common dichotomies such as cognitive versus behaviorist or public versus private arguing instead that these are indispensable sides of single phenomena The result is a set of conceptual tools for analyzing real time social interaction and linking it with enduring relationships and their social contexts The book shows that even or perhaps especially the most mundane social interactions yield rich insights into language culture and mind

Lucy to Language R. I. M. Dunbar, Clive Gamble, J. A. J. Gowlett, 2014-02 This volume readdresses the past contribution from archaeology towards the study of evolutionary issues and ties evolutionary psychology into the extensive historical data from the past allowing us to escape the confined timeframe of the comparatively recent human mind and explore the question of just what it is that makes us so different

*Being Religious* Mladen Turk, 2013-07-12 What makes us religious What is religion This book presents relevant research and theoretical proposals for evolutionary theories of religion and socially and ecologically adaptive theories of religion Most attempts to study religious behaviors through evolutionary biology and related disciplines are still very fragmentary Mladen Turk brings those theoretical approaches in dialogue with religious studies and theology through interpretation and critique that centers on revealing hidden theological assumptions and interpreting theoretical leaps of those approaches to religion In *Being Religious* Turk expounds understanding of religion as a complex interplay of various capacities arising from and influencing our biological and cultural makeup Our religious behaviors can influence our relationship towards each other and towards our environment in significant ways He shows how some aspects of complex religious behaviors can be understood better in light of human cognition and evolutionary biology At the same time he interprets this knowledge as being preliminary and at times inadequate in its claims of completeness and exhaustiveness because religious behaviors are niched within other religious behaviors and dependent on factors that various mono causal theoretical approaches cannot fully conceptualize

**Anthropologischer Anzeiger**, 2004

**World Art Studies** Kitty Zijlmans, Wilfried Van Damme, 2008 This timely volume challenges the narrow Western centrism of most art historical models Archeologists have found that for tens of thousands of years all human cultures have shared a desire for visual representation or expression Yet the study of art history has traditionally focused on Western artworks of the past few centuries World Art

Studies examines the phenomenon of art through a broader cultural global and temporal perspective bringing together a uniquely exhaustive range of perspectives on art and borrowing approaches from the study of neuroscience evolutionary biology anthropology and geography as models alongside more conventional art historical perspectives In musicology or linguistics using such diverse viewpoints for reflection and research is considered part of the normal process In that spirit this volume goes beyond abstract models using case studies to demonstrate and examine specific methods of investigation
