**Common Country Assessment (CCA)** ,2000 Compendium of HHS Evaluations and Relevant Other Studies ,1988  
*Strengthening Monetary Policy Frameworks in the Caucasus and Central Asia* Mr. Tigran Poghosyan,Klakow Akepanidaworn,Maria Atamanchuk,Ezequiel Cabezon,Mr. Selim Cakir,Mr. Vahid Khatami,Filiz Unsal,Ms. Filiz D Unsal,Mariarosaria Comunale,Mrs. Marina Conesa Martinez,Omer Faruk Akbal,2023-08-28 Amidst a global backdrop of persistent post COVID inflation and spillovers from Russia s war in Ukraine the countries of the Caucasus and Central Asia CCA region have faced strong price pressures in recent years Inflation is estimated to have peaked in early 2023 but still exceeds central bank targets In particular core inflation remains stubbornly high reflecting a combination of second round effects surges in global energy and food prices and domestic demand pressures More broadly uncertainty and downside risks also weigh on the economic outlook including due to regional tensions financial turmoil related to international monetary policy normalization and a growth slowdown in key trading partners In this context CCA countries ability to contain inflationary pressures and anchor inflation expectations hinges on the credibility and effectiveness of their monetary policy frameworks Since gaining independence in the 1990s countries in the CCA region have made considerable progress in modernizing their monetary policy frameworks CCA central banks have strengthened their legal frameworks and established broad de jure independence Armenia Georgia Kazakhstan the Kyrgyz Republic and Uzbekistan are transitioning to inflation targeting regimes while the central banks of Azerbaijan Tajikistan and Turkmenistan rely on the exchange rate as an operational target However the post COVID surge in inflation has highlighted the limitations of current frameworks and triggered a fresh policy debate on the need to strengthen monetary policy effectiveness in the CCA This paper reviews the CCA region s monetary policy landscape highlights challenges in monetary policy design and implementation and identifies areas that warrant strengthening It draws on original surveys of country authorities IMF country teams and the work by Unsal and others 2022 It uses novel empirical work to analyze monetary policy transmission the link between foreign exchange interventions and exchange rate dynamics the drivers of financial de dollarization and the effects of central bank communication in the CCA

**Paving the Way to More Resilient, Inclusive, and Greener Economies in the Caucasus and Central Asia** Mr. Nikoloz Giginishvili,Iulia Ruxandra Teodoru,Narek Karapetyan,Ms. Yulia Ustyugova,Mr. Jean van Houtte,Jiri Jonas,Wei Shi,Shant Arzoumanian,Kalin Tintchev,Mr. Kalin I Tintchev,Maxwell Tuuli,Faten Saliba,Farid Talishli,Moataz El-Said,Fernanda Brollo,2023-06-08 Raising long term growth and resilience and improving living standards and inclusion are the top economic policy priorities for countries in the Caucasus and Central Asia CCA The region responded strongly to the COVID shock which unavoidably caused a contraction in output and an increase in poverty and inequality While the region is at the crossroads between the West and the East as it is facing heightened uncertainty due to Russia s war in Ukraine and the rising risk of global fragmentation Climate change is an additional challenge that could have

a significant negative impact on CCA countries in the long term. These challenges however also offer an opportunity for the region to develop a new growth model that could strengthen long term resilience, accelerate income convergence with more advanced country peers and improve human development and social outcomes. The paper argues that a more market based allocation of limited resources is needed to channel capital and labor to their most productive use. The private sector needs to become a key driver of economic activity while the state provides a competitive and market friendly business environment, delivers essential public goods and services, addresses externalities and market failures and mitigates systemic risks. The state also retains a critical role in mobilizing public support and resources for climate policies and protecting the vulnerable. Well designed social safety nets play a key role in reducing poverty and inequality and are essential to the new economic growth model to support human capital development and alleviate the impact of structural reforms on the most vulnerable.

**Exchange Rate Developments and Policies in the Caucasus and Central Asia** Mr. Mark A. Horton, Hossein Samiei, Mr. Natan P. Epstein, Mr. Kevin Ross, 2016-05-16. Since late 2014 exchange rates (ERs) and ER regimes of the Caucasus and Central Asia (CCA) countries have come under strong pressure. This reflects the decline of oil and other commodity prices, weaker growth in Russia and China, depreciation of the Russian ruble and appreciation of the U.S. dollar to which CCA currencies have historically been linked. Weaker fiscal and current account balances and increased dollarization have complicated the picture. CCA countries entered this period with closely managed ER regimes and in many cases currencies assessed by IMF staff to be overvalued. CCA central banks have price stability as their main policy objective and most have relied on ER stability to achieve this objective. Thus the first policy response involved intervention in local foreign exchange (FX) markets, often with limited communication. In this context the IMF staff has reviewed ER policy advice and implementation strategies for CCA countries. [Nigeria, Common Country Assessment](#), 2001. *Regional Economic Outlook, Middle East and Central Asia, May 2025* International Monetary Fund. Middle East and Central Asia Dept., 2025-05. Growth is projected to rise in the Middle East and North Africa in 2025 and 2026 but at a slower pace than anticipated in the October 2024 REO. Across the region rising trade tensions and policy uncertainty are adding to the impact of conflicts and extended oil production cuts to weaken growth prospects. In the Caucasus and Central Asia growth has been robust but is set to moderate to a more sustainable pace. Policymakers must adapt to the new environment, prioritizing macroeconomic stability and accelerating structural reforms to seize global opportunities. **United Nations Common Country Assessment for Zanzibar**, 2001. *Tuvalu United Nations Development Assistance Framework (Kiribati)*, 2002. [Regional Economic Outlook: Middle East and Central Asia, October 2025](#) International Monetary Fund. Middle East and Central Asia Dept., 2025-10-21. Economic performance in the Middle East and Central Asia has shown resilience so far in 2025 despite still elevated global uncertainty and continued regional geopolitical tensions. Growth in Middle East and North Africa is projected to strengthen gradually supported by oil output, strong demand and reforms while growth in the Caucasus and Central Asia is

expected to slow to a more sustainable pace But risks loom weaker global demand tighter financial conditions renewed geopolitical instability and climate shocks could all weigh on the outlook This makes fiscal prudence structural reforms and stronger policy frameworks essential to sustaining durable growth The REO also explores post conflict economic recovery showing that lasting peace requires swift macroeconomic stability adequate financing and stronger institutions to rebuild state capacity
