Guidebook on Alternative Quality Management Systems for Highway Construction Keith Robert Molenaar, Douglas D. Gransberg, David Neil Sillars, 2015. TRB's National Cooperative Highway Research Program NCHRP Report 808. Guidebook on Alternative Quality Management Systems for Highway Construction provides national guidance on standard approaches relating to quality management systems (QMSs). The basis for the report stems from a lack of guidance that resulted in significant investment on the part of transportation agencies, contractors, and consultants to develop unique QMSs for different agencies on a project-by-project basis. The speed at which rapid renewal projects must be delivered creates a demand for a well-defined QMS that can be successfully replicated on a variety of projects. The report will guide readers through the process of developing a QMS that is both responsive to specific project needs and broad enough to be replicated with project-specific adaptations on future projects of similar scope, complexity, and delivery schedule. The project quality assurance organization (QAO) selection forms presented in the report are available online. Publisher's description.
