

ATTENDANCE MANAGEMENT SYSTEM PROJECT DOCUMENTATION

CHAPTER 1 - INTRODUCTION

Project Context

In our life today, the computer is one of many inventions that greatly affect our way of living. In fact, it is noted as an essential tool in many areas including business, government, industry, sciences, education, school, home, and in almost any company and establishment that existed. It can perform process data rapidly, accurately and reliable and by using these machines, spending a lot of time and effort in doing a certain task is minimized.

Computer nowadays has become the most needs of data and information processing. Computers have been very effective in many fields of work and study. It certainly helps man to make his task much easier and with great precision. In schools and universities, computers are used to maintain the basic flow of data and information and checking the credit status of the students. The computer is very useful in performing a great task in data and information processing, securing files, data, and information of the schools and people belong to it. Computer programmers now a day try to build and develop high-quality systems that are very useful. A computerized management system maintains the standard flow of data and information with highly secured and make data processing faster and easier. These computerized systems help one person, company, organization or any type of management agency throughout the world to enhance and develop its general profile.

School attendance is a baseline factor in determining student success. (Great Schools Staff, 2016) The attendance is important because students are more likely to succeed in academics when they attend school consistently. It's difficult for the teacher and the class to build their expertise and growth if a large number of students are often absent. In addition to falling behind in academics, students who are not in school on a regular basis are more likely to get into difficulty with the law and cause problems in their communities.

Purpose and Description

The purpose of this study (Attendance Monitoring System Thesis) is to identify the problems regarding the attendance monitoring of the RTTNHS Su-ay Ext and to implement what is needed by the school. This study is to enhance students' and teachers' attendance performance and school security. This study will develop a system to help the staff and make their attendance monitoring easy and their work with less effort.

With the system, provides a user-friendly environment and effective performance system, this will provide an easier and faster access to the data of every student and teacher in their Attendance Report.

Attendance Management System Project Documentation

Susan K. Land, John W. Walz

Attendance Management System Project Documentation :

Control System Migrations Daniel Roessler,2013-08-29 This new book by the original developer of the BACnet standards explains how BACnet s protocols manage all basic building functions in a seamless integrated way BACnet is a data communication protocol for building automation and control systems developed within ASHRAE in cooperation with ANSI and the ISO This book explains how BACnet works with all major control systems including those made by Honeywell Siemens and Johnson Controls to manage everything from heating to ventilation to lighting to fire control and alarm systems BACnet is used today throughout the world for commercial and institutional buildings with complex mechanical and electrical systems Contractors architects building systems engineers and facilities managers must all be cognizant of BACnet and its applications With a real seat at the table you ll find it easier to understand the intent and use of each of the data sharing techniques controller requirements and opportunities for interoperability between different manufacturers controllers and systems Highlights include A review of the history of BACnet and its essential features including the object model data links network technologies and BACnet system configurations Comprehensive coverage of services including object access file access remote device management and BACnet 2012 s new alarm and event capabilities Insight into future directions for BACnet including wireless networking network security the use of IPv6 extensions for lifts and escalators and a new set of BACnet Web Services Extensive reference appendices for all objects and services and Acronyms and abbreviations
