

# What Is Aseptic Processing Equipment?

Aseptic Processing Equipment is used to sterilize bottles (and caps), then fill and seal them with sterile product, within a sterile environment. Micro Thermo's Aseptic Fillers are linear. The bottles enter the machine on a conveyor. Once inside, the bottles are filled and partially covered with a vaporous sterilant, then proceed into the sterile zone. In the sterile zone, the bottles are dried with a jet of hot, sterile air for decontamination and then moved to the filling station. After bottles are filled with sterile product, they are automatically capped with sterilized bottle caps. The capped bottles then leave the sterile zone and the filler.
